this book deals with the emergence of nominal morphology from a cross linguistic perspective and is closely related to development of verb inflection in first language acquisition ed by d bittner w u dressler m kilani schoch both methodologically and theoretically each of the fourteen contributions studies the early development of the fundamental inflectionally expressed categories of the noun number case gender in

one of the languages belonging to different morphological types isolating fusional inflecting agglutinating root inflecting and families germanic romance slavic baltic greek finnic turc semitic indian american the analyses are based on parallel longitudinal observations of children in their second and early third year of life as well as their input the focus lies on the transition from a pre morphological to a proto morphological stage in which grammatical oppositions and so called mini paradigms begin to develop the point at which children start to discover the morphological structure of their language and the speed with which they develop inflectional distinctions of lexical items has been found to be dependent on the morphological richness of the input language on the paradigmatic as well as the syntagmatic axis of linguistic structure the findings are interpreted within non nativist theoretical frameworks natural morphology usage based theories

discourse markers and modal particles are fuzzy linguistic categories that are difficult to describe the contributions in this volume go beyond this statement they discuss the intersection between modal particles and discourse markers and examine whether or not it is possible to draw a line between these two types of linguistic expressions on the basis of new synchronic and diachronic data from speech and writing from european and asian languages or cross linguistically the authors answer the question whether discourse markers and modal particles are distinct categories whether they form a cline or whether modal particles are a subcategory of discourse markers this common question shows up throughout all chapters which makes the book to a coherent whole by disentangling the complexity of categorizing multifunctional expressions this book also sheds new light on the processes of meaning extension the traditional discourse and modal functions are complemented by interactional and textual ones a must read for functional linguists

the chapters of this volume scrutinize the interplay of different combinations of case animacy and semantic roles thus contributing to our understanding of these notions in a novel way the focus of the chapters lies on showing how animacy affects argument marking unlike previous studies these chapters primarily deal with lesser studied phenomena such as animacy effects on spatial cases and the differences between cases and adpositions in the coding of spatial relations in addition theoretical and diachronic issues related to case and semantic roles are also discussed for example what is case how do cases develop and what are the functional differences between cases and adpositions the chapters deal with a variety of different languages including uralic languages indo european languages basque korean and vaeakau taumako the book is appealing to anyone interested in case animacy and or semantic roles

this volume advances our understanding of two highly debated aspects of grammaticalization its relation to inter subjectification and its directionality these aspects are studied with respect to such phenomena as auxiliaries discourse markers conjunctions prepositions and pronouns bringing together a wide range of languages the collection provides insight into the crucial dimensions of grammaticalization research
