far too ignorant of the histories of the rest of the world being aware of only the accomplishments of greece rome and europe westerners have been made to believe that their societies represent the most superior examples of civilization however the western value system stems from a misconception that as in nature human society too is evolving the idea derives from the hidden influence of secret societies who followed the belief in spiritual evolution of the kabbalah which taught that history would attain its fulfillment when man would become god and make his own laws therefore the infamous illuminati gave its name to the enlightenment of the eighteenth century which claimed that human progress must abandon superstition meaning christianity in favor of reason thus the illuminati succeeded in bringing about the french and american revolutions which instituted the separation of church and state and from that point forward the western values of humanism seen to include secularism human rights democracy and capitalism have been celebrated as the culmination of centuries of human intellectual evolution this is the basis of the propaganda which has been used to foster a clash of civilizations where the islamic world is presented as stubbornly adhering to the anachronistic idea of theocracy where once the spread of christianity and civilizing the world were used as pretexts for colonization today a new white man's burden makes use of human rights and democracy to justify imperial aggression however because after centuries of decline the islamic world is incapable of mobilizing a defense the western powers as part of their age old strategy of divide and conquer have fostered the rise of islamic fundamentalism to both serve as agent provocateurs and to malign the image of islam these sects known to scholars as revivalists opposed the traditions of classical islamic scholarship in order to create the opportunity to rewrite the laws of the religion to better serve their sponsors thus were created the wahhabi and salafi sects of islam from which were derived the muslim brotherhood which has been in the service of the west ever since but the story of the development of these islamic sects involves the bizarre doctrines and hidden networks of occult secret societies being based on a rosicrucian myth of egyptian freemasonry which see the muslim radicals as inheritors of an ancient mystery tradition of the middle east which was passed on to the knights templar during the crusades thus forming the foundation of the legends of the holy grail these beliefs would not only form the cause for the association of western intelligence agencies with islamic fundamentalists but would fundamentally shape much of twentieth century history

count alessandro cagliostro's sincere belief in the magical powers including immortality conferred by his egyptian rite of freemasonry won him fame but made him dangerous enemies too his celebrated travels through the middle east and the capitals of europe ended abruptly in rome in 1789 where he was arrested by the inquisition and condemned to death for heresy the masonic magician tells cagliostro's extraordinary story complete with the first english translation of his egyptian rite of freemasonry ever published the authors examine the case made against him that he was an impostor as well as a heretic

and find that the roman church and history itself have done him a terrible injustice this engaging account drawing on remarkable new documentary evidence shows that the man condemned was a genuine visionary and true champion of freemasonry his teachings have much to reveal to us today not just of the secrets of the movement but of the mysterious hostility it continues to attract

transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential while the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 a space odyssey blade runner the terminator series and more recently the matrix limitless her and transcendence however as its adherents hint at in their own publications transhumanism is an occult project rooted in rosicrucianism and freemasonry and derived from the kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become god modeled on the medieval legend of the golem and frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence spearheaded by the cybernetics group the project resulted in both the development of the modern computer and mk ultra the cia's mind control program mk ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the tree of knowledge and as revealed in the movie lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the internet which is envisioned as the end point of kabbalistic evolution the formation of a collective consciousness or global brain that awaited moment is what ray kurzweil a director of engineering at google refers to as the singularly by accumulating the total of human knowledge and providing access to every aspect of human activity the internet will supposedly achieve omniscience becoming the god of occultism or the masonic all seeing eye of the reverse side of the american dollar bill
