the turkish economy is very dynamic and growing at phenomenal speeds for instance turkey s first quarter gdp growth rate was  
11 percent in 2011 this growth brings its own risks and benefits the lessons learned from surviving and thriving in such an  
environment can be applied to supply chains in any country packed with interesting and timely examples from industries such as  
automotive airline and manufacturing risk intelligent supply chains how leading turkish companies thrive in the age of fragility  
presents strategic insights from various leading turkish companies regarding their management of supply chain risks Çağrı haksöz  
brings the risk intelligent supply chain risc concept to life for the first time it answers the question of how to become a risk  
intelligent supply chain he proposes the i quartet model with four essential roles integrator inquirer improviser and ingenious that  
any supply chain network must play to become risk intelligent the book also presents never before published cases and practices  
of leading turkish companies that thrive globally in the age of fragility with their supply chain risk intelligence while providing

real life examples the book also shares insights obtained in various scientific disciplines it provides not only an industry focus but also details numerous industry approaches analyzing their similarities and differences in a manner that allows each industry to learn from the other

experience the thrill of reading ender s game all over again go deeper into the complexities of orson scott card s classic novel with science fiction and fantasy writers ya authors military strategists including ender prequel series coauthor aaron johnston on ender and the evolution of the child hero burn notice creator matt nix on ender s game as a guide to life hugo award winning writer mary robinette kowal on how ender s game gets away with breaking all the literary rules retired us air force colonel tom ruby on what the military could learn from ender about leadership bestselling ya author Neal Shusterman on the ambivalence toward survival that lies at the heart of ender s story plus pieces by Hilari Bell John Brown Mette Ivie Harrison Janis Ian Alethea Kontis David Lubar and Alison S. Myers John F. Schmitt Ken Scholes Eric James Stone also includes never before seen content from Orson Scott Card on the writing and evolution of the events in ender s game from the design of battle school to the mindset of the pilots who sacrificed themselves in humanity s fight against the Formics

running a business today is becoming more complex than two or three decades ago the world is becoming increasingly open and globalized and the production processes of goods and provision of services are inscribed in global supply and value added chains large corporations are doing well in such a market but small and medium sized enterprises often find it increasingly difficult to function in addition apart from the processes exerting pressure on enterprises operating in the real economy as a result of financial globalization the scope of financial entities banks investment funds stock exchanges was also increasing Knox Hayes Wójcik 2020 however this is a phase of the past currently not only crossing borders but above all far reaching digitalization and the development of modern technologies set the main direction for the development of enterprises Florek Paszkowska et al 2021 in order to cope with these changes both individual companies and entire sectors public administration and society as well as national economies have to make so called digital transformation Gajewski et al 2016 more profound changes are triggered by sustainability ecology and human oriented goals leading towards industry 5.0 all these processes exert pressure both on big companies as well as on small and medium size enterprises the ongoing changes related to the digitalization process mean not only incorporating modern technologies into existing entities and structures but are much more critical they are spiritus movens leading to the transformation of entire sectors of the real economy and the financial markets Marszk Lechman 2021 we can observe the emergence of ecologies and ecosystems Gancarczyk Rodil Marzábal 2022 Piętkowski Urbaniec 2023 mechanisms leading to the development of sharing economies Springer 2020 as well as the increasing rooting and linking of traditional financial services with services leading to meeting the needs of society financial services are embedded in products and become inseparable from these products and the traditional division into sectors is gradually disappearing this is possible thanks to the creation of platforms which connect many market participants Sironi 2021 in the context of the abovementioned far reaching

processes many business entities operate according to traditional principles the key for them are sales profit and liquidity which define the crucial financial performance among important aspects are also such issues as maintaining the security of business operations and obtaining the desired market indicators in stock companies for enterprises from developing countries the basic problem is access to finance the market and advanced technologies jalil et al 2022 Ćasak 2022 in developed countries enterprises also encounter many challenges related to the traditional corporate finance dimension despite a better situation the current issue published in the journal of entrepreneurship management and innovation volume 19 issue 4 2023 is aimed at considering the nexus of topics related to the various aspects of the functioning of financial and non financial enterprises the main purpose of the articles is to focus on selected problems related to the financial aspects of business activity the considered problems were presented in the context of contemporary processes taking place in the environment of enterprises these include on the one hand far reaching digitalization and the use of advanced technologies and on the other hand processes belonging to the environment social and governance esg area a description of the situation faced by many enterprises including financial institutions undergoing digital transformation is presented in the article written by Ćasak and wyciĆlak 2023 digitalization processes not only lead to far reaching digitization of enterprises and related dilemmas regarding corporate governance but also the transformation of entire sectors of the industry the banking sector is the best example of this the question arises what is the pattern of behavior of digital platform partners in the situation of transformation of this sector and platformization of banking services the paper aims to present the dynamic pattern of behavior among partners stemming from the tensions between governance costs and co created value within platforms in banking services the study provides a taxonomy of digital platforms in banking highlights the values of the most typical platforms namely blockchain based and cloud based platforms and discusses the potential implications of the platformization of banking services one of the key contemporary perspectives of business activity is looking through the prism of the need for a responsible and sustainable approach this is the perspective embodied in the approach referred to by the term esg sustainable business models considering the esg principles in the company s operation are based on financial and non financial reasons the paper written by zioĆo szaruga and spoz 2023 aims to examine the relationship between financial and non financial factors in enterprises and indicate for which groups of enterprises the relationship of esg financial performance is most visible in the context of building sustainable business models and the ability to adapt to sustainability it was found that large enterprises with a solid financial position simultaneously get better non financial results in each of the analyzed aspects large enterprises with an excellent financial standing did better the conclusion presented by zioĆo szaruga and spoz 2023 does not change the fact that small and medium sized enterprises play a key role in the economic growth of emerging economies the paper by amoa gyarteng and dhliwayo 2023 examines the impact of capital structure and profitability on the short term solvency of nascent smss in ghana building on the liability of the newness framework the study demonstrates that financing decisions and financial performance are crucial mitigating factors for the potential risks of default and failure faced by nascent smes notably the study finds that an appropriate balance between debt and equity financing raises the working capital ratio and thus reduces the liability of newness

which is a major challenge faced by nascent smes the analysis also identifies that return on equity roe is a crucial driver of short term solvency for nascent smes declining profitability is manifested by a decrease in operating profits and cash flows the resulting cash flow shortages can cause the company to fall behind on payments and obligations leading to short term insolvency with all the adverse consequences all these conclusions might be valuable for enterprises in other developing countries operational and financial market performance is a crucial determinant not only for smes but also for larger companies such type of businesses is presented in the paper by yaşar and gerede 2023 the article shows how complex are the processes accompanying the functioning of such enterprises as airlines this paper refers to the competitiveness of such airline companies and the conditions determining their favorable market position and long term competitive advantage the market position of such companies is influenced by such factors like firm maturity its size financial resources and some technical dimensions number of flights fleet homogeneity this means that despite the processes taking place today the business performance of such entities as airlines still depends on the classic factors described in the literature of corporate finance the contemporary opportunities resulting from the dynamic development of information technology contribute to the development of new forms of financing business activity one such form is crowdfunding the paper by nose and hosomi 2023 is dedicated to the equity crowdfunding ecf issue in the japanese context the research provides an answer to the question of what makes equity crowdfunding successful the signaling hypothesis and lack of financial literacy hypothesis were tested despite the research is focusing more on investors side it also sends an important signal to the business considering crowdfunding as a source of funding the conclusions can be helpful for start ups planning ecf campaigns in the future the company s position on the market may also depend on factors other than financial performance and recently it has depended to an increasing extent on environmental social and governance performance defining corporate sustainability performance in this context very important research thread is the relationship between corporate sustainability performance and stability of dividend payouts this topic is presented in the paper by matuszewska pierzynka mrzygłod and pieloch babiarz 2023 the research verifies many detailed interdependencies between the esg performance of an enterprise and the propensity to pay stable dividends to the enterprise the possibility of financing business activity is determined by the situation in the banking sector the conditions of financing provided by banks are of particular importance in the case of developing countries where other forms of raising capital by enterprises are often limited shaikh tunio and dagar 2023 paper discusses the relationship between banks funding liquidity capital funds and bankers lending activity in emerging markets this research firstly provides insight into the activity of financial companies in emerging markets and secondly informs the public and especially the business about the lending practices of the banking sector and in consequence on the financing opportunities in these economies these unique studies presented in this issue enrich our knowledge about contemporary business activity the papers contribute to understanding the nature of business performance and link corporate finance issues with other mainly technological and social aspects particular attention however is paid to the traditional conditions of operation and financing of enterprises at the same time however efforts were made to combine new business conditions including digitization the issues raised also concern processes

ensuring sustainable development we want to express the hope that the papers presented here will be of interest to readers scholars and researchers worldwide they provide theoretical concepts and quantitative analyses and indicate pathways for further research many of the presented areas require further in depth analysis

this volume constitutes the proceedings of the third working conference on practice driven research on enterprise transformation pret held in luxembourg on september 6 2010 as the industrial track of the 13th ieee conference on commerce and enterprise computing cec 2011 the third edition of pret marks a close collaboration between academia and practice with the specific purpose of mutual learning and crossfertilization top practitioners from industry were invited to submit case studies to give them enough space for presentation only four academic papers were accepted these papers were submitted with a length of 25 pages to enable a more detailed coverage of the related research and to stimulate further discussions during the conference the topics covered are enterprise architecture business and it alignment and business process management and evaluation

the military metaverse explores the impact that the metaverse is having today on how the world s militaries procure maintain train plan and fight and how the metaverse presents new challenges and opportunities for future conflict the military were early adopters of virtual reality and augmented reality technologies and wider simulation systems before 2010 they were one of the few sectors that could afford the technology and millions of military r d dollars went into developing and understanding these technologies however as the democratisation of metaverse technologies has happened over the past decade there is a danger that militaries have been overtaken and caught short encumbered with expensive legacy systems sold and maintained by expensive prime contractors whilst the gaming and consumer market has cheaper and more innovative and agile systems the book provides a history of the use of metaverse technologies in the military particularly in the areas of design maintenance training planning and operations it then examines the current state of the art in these areas and the opportunities that are available from the current generation of consumer driven approaches the drivers for challenges to and paths towards an enterprise approach to the military metaverse are then presented the book explores the military use of social virtual worlds of early work done by defence and security organisations in worlds such as second life and how such environments could become important for intelligence as well as influence operations in the future finally the book will consider what war in the metaverse might look like both in terms on in world activities and the impact of cyber war on the metaverse itself it should be of interest to all militaries across the world the industries that support them and those in academia and the wider public with an interest in the military and defence
