Healthcare remains a field of growth within the US and abroad. According to the US Bureau of Labor Statistics, as the youngest baby boomers continue to ascend in age, the need to employ qualified health care personnel to both prevent and treat medical issues increases. There will be continued substantial growth in the healthcare field from practitioners to operations personnel, including administration and technology. To that end, many practitioners do not want to work in hospitals and clinics as pay at these locations is limited and many, such as SSM Healthcare, place compensatory values on pay. Therefore, many will venture on their own, but herein lies the issue: many medical programs and schools place so much emphasis on symptoms and cures that there is very little training for practitioners that want to operate their own practice.
