ecology and wonder celebrates western canada s breathtaking landscape the book makes several remarkable claims the greatest cultural achievement in the mountain region of western canada may be what has been preserved not what has been developed protecting the spine of the rocky mountains will preserve crucial ecological functions because the process of ecosystem diminshment and species loss has been slowed an ecological thermostat has been kept alive this may well be an important defence against future impacts of climate change in the canadian west

the environmental history of canada is a bleak one resource extraction has always put profits before conservation settlers exploited both the land and the indigenous peoples for commercial gain and big business continues that policy with forests fish minerals tar sands and pipelines as the earth veers toward a biological tipping point as resources become scarcer and as climate change threatens our survival how is canada responding what kind of future can canadians

expect what changes need to be made in about canada the environment award winning author linda pannozzo examines the philosophical economic and ideological landscape of our current environmental worldview she connects our faith in the free market and our adherence to an economic system based on endless growth to illustrate the critical situation of canada s environment regulations and protections where they did exist have been eroded to benefit the bottom line and industrial expansion and resource extraction fueled by cheap energy and consumers insatiable demand for goods have taken an unprecedented environmental toll one that will only be worsened by the realities of climate change ultimately pannozzo argues the solution requires a profound shift in thinking personally politically and economically the inherent value of nature must be recognized for we cannot continue to destroy nature without ultimately destroying ourselves

a timely work this book showcases articles by leading canadian and international historians interested in environmental action and policy including colin m coates ramsay cooke ken cruikshank and donald worster

this edition of the canadian encyclopedia is the largest most comprehensive book ever published in canada for the general reader it is complete every aspect of canada from its rock formations to its rock bands is represented here it is unabridged all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume it has been expanded since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones as a result the text from 1988 has grown by 50 to over 4 000 000 words it has been updated the researchers and contributors worked hard to make the information as current as possible other words apply to this extraordinary work of scholarship authoritative reliable and readable every entry is compiled by an expert equally important every entry is written for a canadian reader from the canadian point of view the finished work many years in the making and the equivalent of forty average sized books is an extraordinary storehouse of information about our country this book deserves pride of place on the bookshelf in every canadian home it is no accident that the cover of this book is based on the canadian flag for the proud truth is that this volume represents a great national achievement from its formal inception in 1979 this encyclopedia has always represented a vote of faith in canada in canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated at the start of a new century and a new millennium in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations this canadian encyclopedia is offered in a spirit of defiance and of faith in our future the statistics behind this volume are staggering the opening sixty pages list the 250 consultants the roughly 4 000 contributors all experts in the field they describe and the scores of researchers editors typesetters proofreaders and others who contributed their skills to this massive project the 2 640 pages incorporate over 10 000 articles and over 4 000 000 words making it the largest some might say the greatest canadian book ever published there are of course many special features these include a map of canada a special page comparing the key statistics of the 23 major canadian cities maps of our cities a variety of tables and photographs and finely detailed illustrations of our wildlife not to mention the colourful informative endpapers but above all the book is encyclopedic which the canadian oxford dictionary describes as embracing all branches of learning this means that with rare exceptions there is satisfaction for the reader who seeks information on any canadian subject from the first entry a mari usque ad mare from sea to sea which is canada s motto and a good description of this volume s range to the zouaves who mustered in quebec to fight for the beleaguered papacy there is the required summary of information clearly and accurately presented for the browser the constant variety of entries and the lure of regular cross references will provide hours of fascination the word encyclopedia derives from greek expressions alluding to a grand circle of knowledge our knowledge has expanded immeasurably since the time that one mind could encompass all that

was known yet now canada's finest scientists academics and specialists have distilled their knowledge of our country between the covers of one volume the result is a book for every canadian who values learning and values canada

canada has abundant natural wealth beautiful landscapes vast forests and thousands of rivers and lakes the land defines canadians as a people yet the country has one of the worst environmental records in the industrialized world building on his previous book the environmental rights revolution 2012 david r boyd one of canada's leading environmental lawyers describes how recognizing the constitutional right to a healthy environment could have a transformative impact by empowering citizens holding governments and industry accountable and improving canada's green record the overwhelming majority of the world's nations now recognize environmental rights through laws constitutions treaties or court decisions boyd explores canada's history of failed efforts to do the same within this international context and offers three pathways to constitutional recognition of the right to a healthy environment this important and provocative book provides a blueprint for renewed leadership in protecting human health the well being of the planet and the interests of future generations

a first comprehensive synopsis of all aleocharine rove beetle species coleoptera staphylinidae recorded from eastern canada from ontario to the maritime provinces inclusively is presented four hundred and seven species in 96 genera and 16 tribes are presented and discussed tribes and subtribes are arranged in presumably phylogenetic order as it is currently recognized genera and subgenera are listed alphabetically species are listed alphabetically or in species groups to better reflect their relationships species distribution is listed by abbreviated provinces and territories in canada and abbreviated states in the united states geographic status is given to every species as native holarctic or adventive with some species listed with undetermined status adventive or holarctic every treated species is presented with a diagnosis including short description of body and description of the median lobe of aedeagus spermatheca and tergite and sternite viii of both sexes for each species a plate with colour habitus image and black and white images of genital structures is provided to aid with positive identification collection and habitat data often new are presented for each species including data on macrohabitat microhabitat collecting period and collecting methods

this pamphlet is based on a section of the canadian history hall a few acres of snow at the national museum of man entitled environment and man

ecological land classification elc refers to the description of land resources at a range of spatial resolutions i.e. global to local and for a range of purposes or values the emerging science of elc is in fact a very carefully integrated blend of vegetation and earth sciences climatology cartography and ecology with a range of new technologies and methodologies including computer based geographic information systems remote sensing and simulation modelling this publication defines the current state of the art of elc it provides particular insight into the role of elc in current and future forest resource planning and management and emphasizes its application and usefulness at various spatial scales for a variety of geographic locations and under a range of management scenarios constraints the book is an invaluable and substantial reference source about the current trends in elc and will be of particular value to ecologists foresters geographers resource managers wildlife biologists gis and remote sensing specialists educators and students

an expanded attribute database that includes attribute data for the ecoprovince level of generalization
