this book in its entirety as well as in each of its parts is an outline of the problems under discussion the subject matter of some eighty sections of the book is extensive it could indeed be presented by experts in as many volumes this study offers an attempt to formulate a synthesis however difficult of the vast amount of available material unlike the well known standard introductions to international law which deal with all the major fields of international law this book treats exclusively the present conceptions of that law as expressed in legal literature international treaties and other agreements international judgements and awards governmental and diplomatic statements and the like special attention is devoted in several chapters of the book to the teachings of the most highly qualified publicists of the various nations which are considered by article 38 paragraph 1 d of the statute of the international court of justice as subsidiary means for the determination of rules of law an endeavor is made to ascertain whether in certain fields of the theory of international law a *communis opinio doctorum* has either been reached or is in the process of achievement some readers may consider that there are too many quotations from writings of publicists others will certainly feel as does this writer that too many outstanding international lawyers have not been included

this book examines theoretical and practical issues concerning the relationship between international law time and history problems relating to time and history are ever present in the work of international lawyers whether understood in terms of the role of historic practice in the doctrine of sources the application of the principle of inter temporal law in dispute settlement or in gaining a coherent insight into the role that was played by international law in past events but very little

has been written about the various different ways in which international lawyers approach or understand the past and it is with a view to exploring the dynamics of that engagement that this book has been compiled in its broadest sense it is possible to identify at least three different ways in which the relationship between international law and its history may be conceived the first is that of a history of international law written in narrative form and mapped out in terms of a teleology of origins development progress or renewal the second is that of history in international law and of the role history plays in arguments about law itself for example in the construction of customary international law the third way of understanding that relationship is in terms of international law in history of understanding how international law has been engaged in the creation of a history that in some senses stands outside the history of international law itself the essays in this collection make clear that each type of engagement with history and international law interweaves various different types of historical narrative pointing to the typically multi layered nature of international lawyers engagement with the past and its importance in shaping the present and future of international law

this new edition of Hugh Thirlway's authoritative text provides an introduction to one of the fundamental questions of the discipline: what is and what is not a source of international law. Traditionally, treaties between states and state practice were seen as the primary means with which to create international law. However, more recent developments have recognized customary international law alongside international treaties and instruments as a key foundation upon which international law is built. This book provides an insightful inquiry into all the recognized or asserted sources of international law. It investigates the impact of ethical principles on the creation of international law, whether soft law norms come into being through the same sources as binding international law, and whether *jus cogens* norms and those involving rights and obligations *erga omnes* have a unique place in the creation of international legal norms. It studies the notion of general principles of international law within international law's sub-disciplines and the evolving relationship between treaty-based law and customary international law. Re-examining the traditional model, it investigates the increasing role of international jurisprudence and looks at the nature of international organisations and non-state actors as potential new sources of international law. This revised and updated book provides a perfect introduction to the law of sources as well as innovative perspectives on new developments, making it essential reading for anyone studying or working in international law.

How does international law impact the behavior of states? This book, designed for students in multiple disciplines, offers a comprehensive, accessible introduction to the law of nations, detailing the evolution of state practice in response to an ever-changing, diverse world. In this new edition of William Slomanson's foundational text, the new authors, Professors Slagter and van Doorn, trace how states manage their sovereignty in myriad ways, working through treaties, international organizations, and international courts to secure their own as well as global interests, with special emphasis on five key areas: human rights, the use of force, human security, and humanitarian intervention, environmental protection, and economic relations. The authors illustrate both the power and limits of international law to provide structure and predictability on a globalized planet.

there has long been an advocacy for the sociology of international law and yet it has never been constructed so systematically and axiomatically as in this book based on vital terms such as action and system this book has conducted an investigation into the auspices or the fundamental international sociological conditions over which international law is built and accordingly into how international law can control global relations the significance of this work lies in its aim of showing by the application of a consistent logic how complex observed phenomena can be explained and understood on the basis of certain shared fundamental perceptions drawn from common experience by asking how a state acts in a complex system that consists of at least two subsystems having different goals and different logics two specific issues are discussed 1 the

relationship between domestic and international law namely that between article 9 of the constitution of japan and the un charter especially the provisions for a collective security system as mentioned in chapter vii 2 the relationship between international law and international politics namely the relationship between the prohibition of the use of nuclear weapons and the logic of nuclear deterrence

chance order change the course of international law general course on public international law by j crawford the course of international law over time needs to be understood if international law is to be understood this work aims to provide such an understanding it is directed not at topics or subject headings sources treaties states human rights and so on but at some of the key unresolved problems of the discipline unresolved they call into question its status as a discipline is international law law properly so called in what respects is it systematic does it can it respect the rule of law these problems can be resolved or at least reduced by an imaginative reading of our shared practices and our increasingly shared history with an emphasis on process in this sense the practice of the institutions of international law is to be understood as the law itself they are in a dialectical relationship with the law shaping it and being shaped by it this is explained by reference to actual cases and examples providing a course of international law in some standard sense as well

the debate about the relationship between international and community law usually centres on the question of which of these two belongs to the other and how special community legal order is in relation to international law in this volume a distinguished group of finnish and british academics and practitioners break new ground by instead of becoming mired in these questions clearly examining the international law aspects of the activities of the community and the union in doing so they have elucidated points of connection and possible points of conflict the result is a thought provoking collection of essays which examines community law through the conceptual grid of international law and thus enriches our understanding of the workings of both

this book has been written with a specific objective in view it seeks to explain and illustrate the cardinal concepts of international law to practising and academic lawyers to students of law and international relations and to anyone interested in developing their understanding of the rules of the international system it also seeks to bring a clarity to international law that is occasionally missing from some specialist works and a comprehensiveness that is always missing from basic introductions finally it seeks to advance an understanding of the international legal order based on a vision of international law as a natural authority called into existence by the demands of the common good of peoples organised into states it strives to avoid both globalist utopianism and the left and right varieties of cynical realism that sometimes haunt international law page xxiii

an accessible introduction to the latest developments in international law in the light of its history and culture

today international law is everywhere wars are fought and opposed in its name it is invoked to claim rights and to challenge them to indict or support political leaders to distribute resources and to expand or limit the powers of domestic and international institutions international law is part of the way political and economic power is used critiqued and sometimes limited despite its claim for neutrality and impartiality it is implicit in what is just as well as what is unjust in the world to understand its operation requires shedding its ideological spell and examining it with a cold eye who are its winners and who are its losers how if at all can it be used to make a better or a less unjust world in this collection of essays professor martti koskenniemi a well known practitioner and a leading theorist and historian of international law examines the recent debates on humanitarian intervention collective security protection of human rights and the fight against impunity and reflects on the use of the professional techniques of international law to intervene politically the essays both illustrate and expand his influential theory of the role of international law in international politics the book is prefaced with an introduction by professor emmanuelle jouannet sorbonne law school which locates the texts in the overall thought and work of martti
