James Rachels's philosophical writings address key questions of contemporary life and the classic dilemmas of moral philosophy. A leading figure in the development of applied ethics, James Rachels became an influential and sometimes controversial thinker on issues concerning animal rights, euthanasia, bioethics, and moral objectivity. This final collection of James Rachels's work brings together fourteen essays that best summarize Rachels's philosophical positions. The essays also shed new light on the depth and breadth of Rachels's work and its importance for contemporary philosophy. Written in Rachels's characteristically lucid literary prose, these essays address the relationship between morality and reason, the duty to relieve both human and animal suffering, the independence of morality from religion, the rejection of relativism and egoism, and the role of ethics in a democratic society. Rachels offers an argument for vegetarianism, examines a controversial case involving a surrogate mother, and speculates on the ethics of political killing. Other essays range from Rachels's interpretation of Nietzsche's philosophy to his appreciation of movies. Rachels was a strong believer in the ability of moral philosophy to improve our lives. This collection, which brings these important works together for the first time, is a testament to both the value of moral philosophy in understanding our world and the richness of Rachels's contributions to this understanding.

Here in a single volume are selections from the writings of William James that cover the entire spectrum of his work as psychologist, moral philosopher, pragmatist, and metaphysician. These selections concentrate on the theme of James's moral philosophy. Although James was acknowledged as one of the dominant philosophers of his time, his total moral perspective is not easy to grasp. This is because he never developed a fully unified statement of his position; rather, his illuminating reflections on moral issues were scattered unsystematically throughout his writings. This volume focuses attention on writings that are at the heart of James's ethical perspective. Book jacket

many ethicists either accept the reflective equilibrium method or think that anything goes in ethical theorizing as long as the results are plausible the aim of this book is to advance methodological thinking in ethics beyond these common attitudes and to raise new methodological questions about how moral philosophy should be done what are we entitled to assume as the starting point of our ethical inquiry what is the role of empirical sciences in ethics is there just one general method for doing moral philosophy
