the choice of different modalities for transferring resources to extremely poor households food provided in kind cash or intermediate modalities such as vouchers has long been the subject of active debate in both policy and research this note provides an overview of the recent evidence around the relative effectiveness of cash and food aid drawing on studies conducted over the last 20 years around the world each modality has some potential advantages cash transfers are flexible in allowing recipients to use resources to meet a range of material needs including but not limited to food and when they do choose to purchase food allows them to choose a basket of items that is optimal based on their preferences the corresponding disadvantage of food transfers is that if recipients desire nonfood items they have to resell food for funds often at a nontrivial transaction cost cash transfers are often easier and lower cost to deliver particularly given the substantial growth of electronic payment systems compared with the more complex logistical requirements of delivering food especially perishable food they are also generally less observable potentially rendering them less likely to generate stigma or demands for sharing from nonrecipients cash can also have indirect beneficiaries through positive spillover effects in the local economy though the evidence base for this is not large and suggests that spillovers may be negative in some contexts

pitirim a sorokin 1889 1968 was one of the most original important and controversial figures in american sociology his spectacular rise from a peasant childhood in czarist russia to the olympian heights of harvard university provides an unlikely and fascinating lens for examining the history of an entire discipline and as barry johnston shows his equally dramatic fall from favor and unexpected resurrection illuminate both sorokin s life and the tempestuous world of academic politics an outspoken revolutionary and secretary to alexander kerensky sorokin was imprisoned and ordered executed by lenin then reprieved and exiled during the 1920s he flourished as a teacher and scholar at the university of minnesota where he published several pioneering books on the russian revolution social mobility sociological theory and rural sociology harvard president a lawrence lowell was so impressed that he recruited sorokin to chair the university s first department of sociology from 1930 to 1944 the department prospered under sorokin s leadership attracting an entire generation of young scholars who in their own right would have a profound impact on the discipline in this period sorokin published several volumes of his magnum opus social and cultural dynamics and became embroiled in a bitter battle with rival talcott parsons for control of the department parsons ultimately deposed sorokin and transformed sociology into the department of social relations sorokin nevertheless stayed on at harvard where he established the center for creative altruism but otherwise continued to work in relative obscurity finally in 1963 after years in eclipse sorokin was recognized for his accomplishments when he was elected president of the american sociological association during a long and distinguished career sorokin amassed an amazingly diverse and substantial body of work much of which set the standard for the field at the same time he broke with the conventions of sociology frequently ridiculing and taunting his less adventurous colleagues for his heresy the flamboyant sorokin was condemned and driven to the periphery of a profession anxious for legitimacy as a science as a result sorokin s ideas have been consistently ignored and misunderstood for more than a quarter century based on exhaustive research in sorokin s papers and the harvard archives as well as

interviews with sorokin s surviving family members former students and colleagues this biography restores sorokin to his rightful place in the pantheon of american intellectuals
