what are the differences between the sexes that is the question that ann oakley set out to answer in this pioneering study now established as a classic in the field to answer it she draws on the evidence of biology anthropology sociology and the study of animal behaviour to cut through popular myths and reach the underlying truth she demonstrates conclusively that men and women are not two separate groups rather each individual takes his or her place on a continuous scale she shows how different societies define masculinity and femininity in different and even opposite ways and discusses how far observable differences are based on biology and psychology and how far on cultural conditioning many
