this book seeks to educate and equip aspiring professionals industry practitioners and students in the knowledge and practice of contract administration and procurement in the singapore construction industry it discusses the roles of and relationships between the different parties e g owner architect quantity surveyor tendering procedures project delivery methods payments variations final account and other aspects for the administration of construction contracts in singapore this second edition has been updated to include tender evaluation in procuring consultants using the quality fee method tender evaluation in procuring contractors using the price quality method and payment claim and payment response as amended by the building and construction industry security of payment amendment act 2018 and amended regulations 2019 the book is written in an easy and readable form technical jargon is minimised the topics include both common and less common issues in industry that practitioners and students should be aware most of the examples are obtained from industry with modifications and reflect current practices timelines flowcharts sample forms sample letters and other documents illustrating the processes are provided in this work for the easy understanding of the readers the contract administration process takes into account the singapore institute of architects measurement contract 9th edition the public sector standard conditions of contract for construction works 7th edition and also the building and construction industry security of payment act

the purpose of this work is to create a simple guide to effective contract management for the contractor and sub contractor who simply do not have the expertise on board to ensure that contracts are effectively managed it may also be used as a check of all the items to be considered by contract managers who have the expertise when carrying out their tasks without legal speak it seeks to guide the contractor and subcontractor through the considerations and steps necessary to successfully deliver a project and in the process avoid potential conflict furthermore it will guide the contractor on the actions required to ensure that the correct processes are implemented to protect the contractor should any dispute arise that may or may not be the fault of the contractor all contracts commence with the best of intentions but unfortunately it is becoming increasingly common for contracts to go awry and the contractor will need to ensure that all changes to the contract are properly addressed and that the correct processes as stipulated in the contract are implemented impeccable record keeping will ensure effective contracts management and is the best defence against any potential claims that may occur due to disputes which arise when the project is not delivered as originally

envisaged these records will enable a professional to successfully prepare the required claim and defence when and if the need arises there is no intention in this guide to focus on any specific form of contract legal opinion or clauses within contracts but rather to guide the contractor in the effective management of the contract what is set out in the following chapters are the fundamentals of contract management in a simple format which is easy to follow for the successful delivery of a project it will be of paramount importance that the required processes are implemented from the very beginning of the project and continuously updated and maintained until the final certificate of completion has been obtained and that the full payment dues have been received this guide will also ensure that the contractor acquires an understanding of contract obligations and the implementation of the processes necessary for a successful project delivery

a contract or an agreement is associated with almost everything wherein more than one person or party is involved whether it s a marriage purchase of a property or construction of a project all need a proper contract and in turn they need resilient and robust contract administration today large value and complex contracts have to cater to the needs of globalization increased regulations and the ever changing technologies these complexities have contributed to an environment rendering administration of a contract difficult therefore projects are prone to delays additional unforeseen expenses and may also all together lead to a project failure this has also led many organizations to view a contract as a tool to have undue control by imposing rigid standards and conditions oblivious to the fact that these may not always be to their advantage it is with this intent that this book has been written by an experienced contracts manager who has had a first hand experience of the struggle while going through a jargon of clauses and documents within a contract the basis of expectations requires an overall understanding of the contract and the author expects that this book comes handy to such a professional in his her pursuit of excellence

construction contract administration for project owners is aimed at public and private owners of real estate and construction projects the book is intended to assist owners in their contractual dealings with their designers and their contractors most owners are not primarily in the business of designing and building facilities the fact that their primary business is not design and construction places them at a disadvantage when negotiating drafting and administering design agreements and construction contracts because their designers and contractors use these documents every day this book is intended to assist owners to redress this imbalance by equipping owners to draft and administer contracts so as to protect their interests the book is aimed at owner personnel with all levels of knowledge in the business of managing projects it can serve as a comprehensive introduction to drafting and administering design agreements and construction contracts for beginners for intermediate level personnel it can serve as a manual to be read to enhance the reader s skills in this area for the sophisticated project management professional it can serve as a resource to be consulted in connection with very specific issues as they arise on a project
