it is hardly necessary to day to advance a plea for the teaching of drawing design and craft work their importance is or should be recognised by all authorities on education it is well however that the teacher should have a clear comprehension of the part played by these subjects in the development of the intellect and character of the scholar this is essential firstly that he may have confidence in his teaching with a corresponding strength of purpose and enthusiasm and secondly that he may be in a position to defend effectively his belief in the work he is doing despite the fact that the majority of educational authorities recognise its value critics still abound who would have us believe that such work merely panders to effeminate tastes and a love of luxury whilst denying its practical utility such critics need to be confuted and this can only be done by formulating definite reasons for the serious study of the subjects in hand at the outset we must recognise that man is complex and many sided hence his needs are complex and multifarious an unfortunate tendency exists in some quarters to regard human beings merely as productive machines with a capacity for executing so much work upon which the profit usually accruing to those holding this view will be so much and that education should therefore be designed on this basis such an opinion is unworthy of consideration and may be dismissed at once it must be granted that as far as possible all human capacities are worth developing otherwise the curriculum will have a bias tending to develop certain faculties leaving others to become atrophied it is in some such comprehensive scheme that art

work as here dealt with plays its part it develops certain powers for which no scope is permitted in other subjects the faculty of observation is quickened by training the vision whilst the memory is cultivated to retain the images thus correctly seen drawing is a method of expression older by far and more natural than writing for the alphabet in use to day is a development of early picture writing again the child as soon as he can walk endeavours to express graphically the beings and objects amongst which he lives making no attempt to write
