dedicates considerable space to the crucial role of engineers in addressing environmental sustainability. It analyzes case studies where environmentally damaging practices were overlooked due to costcutting measures or a lack of ethical awareness. This aligns with the increasing pressure on industries to adopt sustainable practices, mirroring the global push towards carbon neutrality and responsible resource management. As Dr Christiana Figueres, former Executive Secretary of the UNFCCC, has stated, We need to build a new economy that is fundamentally different from the one we have today. Globalization and Supply Chain Ethics. The complexity of global supply chains presents unique ethical challenges, particularly concerning labor practices, environmental standards, and intellectual property rights. Baura's analysis of these issues provides a framework for navigating the ethical complexities inherent in international collaborations, stressing the importance of due diligence and transparent practices. This directly addresses the concerns voiced by organizations like Fairtrade International, which advocates for fair labor practices throughout global supply chains. Case Studies Learning from Past Mistakes. The ebook incorporates compelling case studies illustrating both successes and failures in ethical decisionmaking. For instance, a study on a bridge collapse due to costcutting measures highlights the devastating consequences of compromising safety standards. Conversely, a case study showcasing a company's proactive approach to environmental sustainability demonstrates the positive impact of ethical practices on both brand reputation and bottom line. These realworld examples provide invaluable learning opportunities offering practical insights into the challenges engineers face and effective strategies for navigating ethical dilemmas. Expert Quotes Adding Weight to the Argument. Baura masterfully weaves in quotes from prominent engineers, ethicists, and industry leaders, lending credibility and depth to the arguments presented.
