bernard lonergan is a world renowned philosopher methodologist and theologian the complexity of his work has tended to limit his accessibility to average readers bringing bernard lonergan down to earth seeks to remedy this limitation by showing how lonergan did address problems of community life he also broadened his interest after writing insight to include a reaching into our hearts as modeled for example by the genius blaise pascal lonergan also sought to bridge religious divides here the christian theological virtues of faith hope and love are indispensable but that does not curtail from lonergan s uncanny ability to reach out to secularists by focusing on ethics the importance of lonergan s interdisciplinary work is signaled in the book s twelve explorations in the concluding part iv that detail for interested readers his extraordinary ability to solve major philosophical issues

this book examines the human desire for god through the lens of bernard lonergan s concrete subjectivity with lonergan as an integrating thread the author engages a variety of thinkers including hans urs von balthazar jean luc marion rene girard lawrence feingold john milbank john paul ii benedict xvi pope francis among others the givenness of desire investigates our paradoxical desire for god that is rooted in both the natural and supernatural

using the thomist notion of wisdom as a key for interpretation coelho traces the flowering of the universal viewpoint into a mature theological method one that holds out the hope of an effective transcultural mediation of meanings and values

according to the nicene creed christ died for us and for our salvation but while all christians agree that christ s death and resurrection has saving significance there is little unanimity in how and why that is the case in fact christian history is littered with various accounts of the redemptive value of christ s death and new models and motifs are constantly being proposed many of which now stand in stark contrast to earlier reflections how then should contemporary articulations of the cross s saving significance be judged at the heart of this book is the contention that christian reflection on the atonement is faithful inasmuch as it incorporates the intention that jesus himself had for his death in a wide reaching study the author draws from both classical scholarship and recent work on the historical jesus to argue that not only did jesus imbue his death with redemptive meaning but that such meaning should impact expressions of the cross s saving significance

if natural law arguments struggle to gain traction in contemporary moral and political discourse could it be because we moderns do not share the understanding of nature on which that language was developed building on the work of important thinkers of the last half century including leo strauss eric voegelin john finnis and bernard lonergan the essays in concepts of nature compare and contrast classical medieval

and modern conceptions of nature in order to better understand how and why the concept of nature no longer seems to provide a limit or standard for human action these essays also evaluate whether a rearticulation of pre modern ideas or perhaps a reconciliation or reconstitution on modern terms is desirable and or possible edited by r j snell and steven f mcguire this book will be of interest to intellectual historians political theorists theologians and philosophers

includes part 1 number 1 books and pamphlets including serials and contributions to periodicals january june
