this open access book presents work collected through the liquefaction experiments and analysis projects leap in 2017 it addresses the

repeatability variability and sensitivity of lateral spreading observed in twenty four centrifuge model tests on mildly sloping liquefiable sand the centrifuge tests were conducted at nine different centrifuge facilities around the world for the first time a sufficient number of experiments were conducted to enable assessment of variability of centrifuge test results the experimental data provided a unique basis for assessing the capabilities of twelve different simulation platforms for numerical simulation of soil liquefaction the results of the experiments and the numerical simulations are presented and discussed in papers submitted by the project participants the work presented in this book was followed by leap asia that included assessment of a generalized scaling law and culminated in a workshop in osaka japan in march 2019 leap 2020 ongoing at the time of printing is addressing the validation of soil structure interaction analyses of retaining walls involving a liquefiable soil a workshop is planned at rpi usa in 2020

welcome to the proceedings of the 9th international conference on intelligent virtual agents held september 14 16 2009 in amsterdam the netherlands intelligent virtual agents ivas are interactive characters that exhibit hum like qualities and communicate with humans or with each other using natural human modalities such as speech and gesture they are capable of real time perception cognition and action allowing them to participate in a dynamic physical and social environment iva is an interdisciplinary annual conference and the main forum for presenting research on modeling developing and evaluating ivas with a focus on communicative abilities and social behavior the development of ivas requires expertise in multimodal interaction and several ai elds such as cognitive modeling planning vision and natural language processing computational models are typically based on experimental studies and theories of human human and human robot interaction conversely iva technology may provide interesting lessons for these elds the realization of engaging ivas is a challenging task so reusable modules and tools are of great value the elds of application range from robot assistants social simulation and tutoring to games and artistic exploration
