**Phase 2 Implementation and Configuration** This phase involved configuring the chosen ERP system to meet MSEs specific needs customizing workflows and training employees

Activity	Description	Impact	Challenges
System Configuration	Tailoring the ERP system to MSEs business processes	Improved workflow efficiency and data integration	Complexity of customization and potential for errors
Data Migration	Transferring data from legacy systems to the new ERP system	A unified and consistent data repository	Data loss and inconsistency during migration
User Training	Providing employees with training on the new ERP system	Enhanced user adoption and proficiency	Difficulty in scheduling training and ensuring adequate participation
Testing and GoLive	Rigorous testing to identify and resolve bugs before launching the system	Smooth transition to the new system	Identifying and resolving unforeseen issues during testing

**Figure 2 Pie Chart showing Resource Allocation during Implementation** Insert a pie chart depicting the allocation of resources budget personnel time during the implementation phase This will visually demonstrate the key resource demands

**Phase 3 PostImplementation and Ongoing Support** This crucial phase focused on ongoing system maintenance user support and continuous improvement

Activity	Description	Impact	Challenges
System Maintenance	Regular updates and patches to ensure system stability	Minimizing system downtime and security breaches	Ensuring timely and effective maintenance
User Support	Providing assistance to users facing issues with the system	High user satisfaction and productivity	Responding effectively to user queries and resolving issues promptly
Process Optimization	Continuously improving business processes based on data insights from the ERP system	Enhanced efficiency and productivity	Resistance to change and adapting to new processes
System Upgrades	Regularly upgrading the ERP system to leverage new features and functionalities	Staying up-to-date with technology and optimizing system performance	Managing the complexity of upgrades and minimizing disruptions

the west is popularly perceived as america s last outpost of unfettered opportunity but  
twentieth century corporate tourism has transformed it into america s land of opportunism  
from sun valley to santa fe towns throughout the west have been turned over to outsiders  
and not just to those who visit and move on but to those who stay and control although  
tourism has been a blessing for many bringing economic and cultural prosperity to  
communities without obvious means of support or allowing towns on the brink of extinction  
to renew themselves the costs on more intangible levels may be said to outweigh the  
benefits and be a devil s bargain in the making hal rothman examines the effect of twentieth  
century tourism on the west and exposes that industry s darker side he tells how tourism  
evolved from grand canyon rail trips to sun valley ski weekends and disneyland vacations  
and how the post world war ii boom in air travel and luxury hotels capitalized on a surge in  
discretionary income for many americans combined with newfound leisure time from major  
destinations like las vegas to revitalized towns like aspen and moab rothman reveals how the  
introduction of tourism into a community may seem innocuous but residents gradually  
realize as they seek to preserve the authenticity of their communities that decision making  
power has subtly shifted from the community itself to the newly arrived corporate  
financiers and because tourism often results in a redistribution of wealth and power to  
outsiders observes rothman it represents a new form of colonialism for the region by

depicting the nature of tourism in the american west through true stories of places and individuals that have felt its grasp rothman doesn t just document the effects of tourism but provides us with an enlightened explanation of the shape these changes take deftly balancing historical perspective with an eye for what s happening in the region right now his book sets new standards for the study of tourism and is one that no citizen of the west whose life is touched by that industry can afford to ignore
