for many reasons this decade is a time of rethinking many things there is the impending turn of the millenium an event packed with meaning there is recent political history which has changed the global structure of power in ways few could foresee and there is an economic fluidity worldwide that makes every day unpredictable and the future uncertain there are movements of people and surges of violence that seem unparalleled and well may be we are awash in change and people everywhere are trying to understand that and read its implications it is a time that provokes soul searching backward into the lessons and achievements of the past and forward into ways for the future to be better the fields of health and social development are no exception more specifically events and conditions in the health sector point to the need to rethink some large issues nations everywhere are grappling with the economic and ethical dilemmas of achieving and maintaining healthy populations since these are both cause and consequence of true development increasingly the thinking is global because there are comparisons to be

learned from connections that have implications obligations to fulfill and costs that are somehow shared as part of this dynamic there has been an explosion of analytic documents published since the start of this decade that deal mainly though not exclusively with health in developing countries the purpose of global health in transition is to distill the essential elements from those efforts discuss the major ideas they share and the thoughts they prompt ask what those might mean for a next agenda in global health and comment on the shifting context in which our current concepts of the ideal will prove or not prove their adequacy for the future

for over a decade global health watch has been the definitive source for alternative analysis on health this new edition addresses the key challenges facing governments and health practitioners today within the context of rapid shifts in global governance mechanisms and the un s sustainable development goals like its predecessors it challenges conventional wisdom while pioneering innovative new approaches to the field collaboratively written by academics and activists drawn from a variety of movements research institutions and civil society groups it covers some of the most pressing issues in world health from the resurgence of epidemic diseases such as ebola to the crisis in the who climate change and the war on drugs combining rigorous analysis with practical policy suggestions global health watch 5 offers an accessible and compelling case for a radical new approach to health and healthcare across the world

food aid policy to governance in the seed industry and international food safety standards

for many it was more than a publication it was a way of life the whole earth catalog billed itself as access to tools and it grew from a bay area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream america now known as living off the grid in recovering the history of the catalog s unique brand of environmentalism historian kirk recounts how stewart brand and the point foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living kirk shows us that whole earth was more than a mere counterculture fad at a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way from publisher description
