this book brings together a collection of current research on the assessment of oral proficiency in a second language fourteen chapters focus on the use of the language proficiency interview or lpi to assess oral proficiency the volume addresses the central issue of validity in proficiency assessment the ways in which the language proficiency

interview is accomplished through discourse contributors draw on a variety of discourse perspectives including the ethnography of speaking conversation analysis language socialization theory sociolinguistic variation theory human interaction research and systemic functional linguistics and for the first time lpiis conducted in german korean and spanish are examined as well as interviews in english this book sheds light on such important issues as how speaking ability can be defined independently of an lpi that is designed to assess it and the extent to which an lpi is an authentic representation of ordinary conversation in the target language it will be of considerable interest to language testers discourse analysts second language acquisition researchers foreign language specialists and anyone concerned with proficiency issues in language teaching and testing

members of divergent societies are increasingly involved in interactional situations both publicly and privately where participants do not share linguistic resources second language conversations have become common everyday events in the globalized world and an interest has evolved to determine how interaction is conducted and understanding achieved in such asymmetric conversations this book describes how mutual intelligibility is established checked and remedied in authentic interaction between first and second language speakers both in institutional and everyday situations the study is rooted in the interactional view on language and it contributes to our knowledge on interactional practices in particular in cases where some doubt exists about the level of intersubjectivity between the participants it expands the traditional research agenda of conversation analysis that is based on the concepts of membership and members shared competences by showing in detail how speakers with restricted linguistic resources can interact successfully and achieve the institutional goals of interactions this study also adds to our knowledge of the questions that are central in second language research such as when and how the non native speakers linguistic output is modified by themselves or by the native speakers or when the nonnative speakers display uptake after these modifications

this book is a thorough revision of the highly successful text first published in 1994 the authors retain the multidisciplinary approach that presents research from linguistics sociology psychology and education in a format designed for use in an introductory course for undergraduate or graduate students the research is updated throughout and there are new sections and chapters in this second edition as well new chapters cover child language acquisition first and second universal grammar and instructed language learning new sections address issues such as what data analysis doesn't show replication of research findings interlanguage transfer multilingual acquisition and transfer the aspect hypothesis general nativism connectionist approaches and implicit explicit

knowledge major updates include nonlanguage influences and the lexicon the workbook second language learning data analysis second edition makes an ideal accompaniment to the text

this preparatory manual is a single source reference for postgraduate exam preparation intense efforts have gone in preparation of the book to make it complete in all aspects in depth coverage of every subject in the form of synopsis is the highlight of the book to enhance rapid reading quick learning facts have been framed as an effective learning tool multiple choice questions have been designed to suit both national and international competitive postgraduate entrance examinations

first published in 1998 this teacher s manual which accompanies the second edition of second language learning data analysis provides suggested answers to the problems presented in the text the goal of the text is to give students practice in analyzing data by providing hands on experience with actual second language data

this book builds on baker and egbert s previous work on triangulating methodological approaches in corpus linguistics and takes triangulation one step further to highlight its broader applicability when implemented with other linguistic research methods the volume showcases research methods from other linguistic disciplines and draws on ten empirical studies from a range of topics in psycholinguistics applied linguistics and discourse analysis to demonstrate how these methods might be most effectively triangulated with corpus linguistic methods a concluding chapter synthesizes these findings as a means of pointing the way toward future directions for triangulation and its implications for future linguistic research the combined effect reveals the potential for the triangulation of these methods to not only enhance rigor in empirical linguistic research but also our understanding of linguistic phenomena and variation by studying them from multiple perspectives making this book essential reading for graduate students and researchers in corpus linguistics applied linguistics psycholinguistics and discourse analysis
