leadership for health professionals theory skills and applications applies

classical knowledge of leadership theory and time honored best practices of industry leaders to a health organization context themes of leadership principles applications and constructs such as organizational culture cultural competency ethical frameworks and moral practice scientific methodology leader competencies external and internal assessment and evaluation communication planning decision making employee enhancement and knowledge management are woven through the entire text

the second decade of the twenty first century has witnessed a surging interest in personalized medicine with the concomitant promise to enable more precise diagnosis and treatment of disease and illness based upon an individual's unique genetic makeup in this book my goal is to contribute to a growing body of literature on personalized medicine by tracing and analyzing how this field has blossomed in asia in so doing i aim to illustrate how various social and economic forces shape the co production of science and social order in global contexts this book shows that there are inextricable transnational linkages between developing and developed countries and also provides a theoretically guided and empirically grounded understanding of the formation and usage of particular racial and ethnic human taxonomies in local national and transnational settings the open access version of this book available at taylorfrancis com doi view 10 4324 9781315537177 has been made available under a creative commons attribution non commercial no derivatives 4 0 license

closing death's door brings the psychology of decision making together with the law to explore ways to improve patient safety and reduce iatrogenic injury the cause of as many as 400 000 us deaths every year in a world where neither the healthcare industry itself nor the legal system has made a serious dent in the problem

bridge the gap between pathophysiology and clinical medicine in a succinct outline of core internal medicine topics originally created and road tested by a resident and then updated by a team of resident authors huppert's notes succinctly organizes the foundational science covered early in medical school and the clinical approaches encountered in clerkships and beyond this marriage of pathophysiology and clinical medicine provides a framework for how to approach internal medicine concepts mechanistically rather than through memorization you'll find concise descriptions of common medical conditions with diagnostic and management pearls as well as high yield diagrams and tables to emphasize key concepts covering all internal medicine subspecialties

each huppert s notes chapter is organized in an intuitive and consistent outline format for rapid access anatomy physiology diagnostics approaches chief complaints diseases pathophysiology key medications interventions key clinical trials publications space for your personal notes
