as the most important figures in the history of economics the work of john maynard keynes is nearly without precedent in the history of economics the economic consequences of peace first published in 1919 achieved great notoriety due of

its contemptuous critique of the french premier as well as president woodrow wilson keynes criticized the allied victors for signing the treaty of versailles in 1920 which would have ruinous consequences for europe at the time few world and economic leaders appreciated his criticisms as keynes saw his worst fears realized in the rise of adolf hitler and the resulting devastation of world war ii john maynard keynes 1883 1946 was born into an academic family his father john neville keynes was a lecturer at the university of cambridge where he taught logic and political economy while his son was educated at eton and cambridge most importantly keynes revolutionized economics with his classic book the general theory of employment interest and money 1936 this work is generally regarded as perhaps the most influential social science treatise of the 20th century as it quickly and permanently changed the scope of economic thought interestingly keynes was a central member of the bloomsbury group a collection of upper class edwardian aesthetes that served as his life outside of economics which included virginia woolf clive bell and lytton strachey

john law 1671 1729 left a remarkable legacy of economic concepts from a time when economic conceptualization was very much at an embryonic stage yet he is best known and generally dismissed today as a rake duellist and gambler this intellectual biography offers a new approach to law one that shows him to have been a significant economic theorist with a vision that he attempted to implement as policy in early eighteenth century europe law s style marked by a clarity and use of modern terminology stands out starkly against the turgid prose of many of his contemporaries his vision of a monetary and financial system was certainly one of a later age for law believed in an economy of banknotes and credit where specie had no role to play ultimately law failed as a policy maker in part because of the entrenchment of the financiers and their aristocratic backers and in part because of theoretical flaws in his vision his struggle for power took

place against the background of europe s first major stock boom and collapse the collapse of the mississippi system which he had conceived and the south sea bubble led to a lasting impression of law as a failure it is this impression that antoin murphy seeks to dispel
