excerpt from general sociology an exposition of the main development in sociological theory from spencer to ratzenhofer treatises always have their place but one may venture the belief that in the present stage of sociological thought there is more use for the humbler service of a conspectus there is more in common between the scattered forces of sociology than can easily be made to appear differences of emphasis create illusions of separateness and even antagonism where there is only division of labor disagreements about details of fact or method cover up unities in fundamental conception a distinctive social philosophy is already here and the sociologists accept it more generally than most of their number realize we need claim for it no more than that it is a point of view first about the reality in question and second about ways of inquiring into the reality this philosophy has happily as yet a very meager doctrinal content as distinguished from its literature of scope and method it is the more free to grow into a commanding scientific technique whoever attempts to map the present outlook of sociology will of course put his own limitations on exhibit but even a rude chart of present sociology will doubtless pay for itself in helping others presently to make a better one the following outline accordingly contains the skeleton of a lecture course occupying four hours a week for an academic year and of a program of seminar work in sociological methodology continuing through three

years the outline also represents in a general way the point of view occupied by my colleagues in the department of sociology in the university of chicago of course they are in no way responsible for anything which this syllabus contains and i do not know to what extent their conclusions about details may differ from those here indicated about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
