bachelor thesis from the year 2012 in the subject leadership and human resources miscellaneous grade 1 7 university of applied sciences essen course konfliktmanagement language english abstract explanation of the different negotiation tactics and body language styles in theory compared to the actual behaviour of german negotiators supply chain management is a vast topic and enfolds every task involved

in the movement and storage of raw materials work in process inventory as well as finished goods from the first design step to the ready to deliver good one topic that influences all the different steps in the supply chain is procurement in today's world the business competition has grown due to the globalisation therefore it becomes every harder to get the best possible goods for the best possible price that makes it challenging to produce goods cheap and sell them with an acceptable price on the market due to that fact procurement becomes more important for every company especially in western countries because here the wages and production costs have a higher level as in developing countries to stay competitive regarding companies from such countries procurement can be an useful instrument in countries such as uk and the usa supply chain management and especially procurement has become an important part in nearly every company several specialised bachelor and master programmes have been developed to match the demanded requirements for procurement executives in germany such programmes are nearly nonexistent here procurement is not disregarded but purchasers are often career changers thus they are quite often no experts many courses of instruction are offered but they do not prepare the buyers as good as a complete field of study would do this is the part the bachelor thesis will concern in most works or theories only the negotiation strategies and tactics are regarded sometimes in the combination with body language but one analysing the actual negotiation behaviour in the standard situations of german purchasers and comparing them to the theory to find starting points that can be improved cannot be found thus the question arises whether it is true that there is a lack of information and education in this area

mastering business negotiation is a handy resource for any leader or manager who needs practical strategies and ideas when conducting business negotiations grounded in solid research the authors experts in the field of business negotiation reduce the huge volume of available information into an accessible handbook for busy executives who need to prepare for everyday negotiations as well as for more demanding and complex negotiation situations mastering business negotiation offers down to earth advice for learning to play the negotiation game and shows how to understand the game so you can better control what happens predict the sequence of negotiation activities and move from disagreement toward agreement identify the strategies and tactics of other players in the game apply the rules of the game the do's and don'ts that will ultimately lead to success

bachelor thesis from the year 2016 in the subject psychology work business organisation grade 10 university of applied sciences aschaffenburg language english abstract whether people are bargaining for the price of a flower at the florist's around the corner a teenager is negotiating about the time he has to be home at night or the german bayer ag is negotiating a 66bn takeover deal with monsanto negotiations happen every day for different reasons even though we are negotiating every day there is still a misunderstanding about negotiations that often jeopardizes the outcome of the negotiation most people think that negotiating is a sequence of rational decision processes whereas as a matter of fact negotiating involves a dimension that is most often underestimated or ignored emotions these might be positive emotions like happiness or negative emotions like disappointment and guilt but what they all have in common is that they significantly impact negotiations this lack of awareness about the influence of emotions on negotiations often leads to negotiation strategies that ignore emotions even though recognizing and using emotions can significantly improve the negotiation experience and results based on the assumption that emotions do influence negotiations this thesis focuses on the question how different

emotions influence the negotiation and which skills and knowledge are necessary in order to improve negotiations through emotional intelligence

communication in uncertain times explores how different organizations from private to governmental and non profit deal with issues risks and crisis situations through communication

scholars of dispute resolution and organizations at northwestern university draw on their ten years of research to extend earlier studies of the role of cognition in negotiation they emphasize the importance of concentrating on the opponents judgement of their options and strategies annotation copyrighted by book news inc portland or
