a portion of the revenue from this book's sales will be donated to doctors without borders to assist the humanitarian work of nurses, doctors, and other health care providers in the fight against COVID-19 and beyond. Concepts and cases in nursing ethics is an introduction to contemporary ethical issues in health care designed especially for Canadian audiences. The book is organized around six key concepts: beneficence, autonomy, truth telling, confidentiality, justice, and integrity. Each of these concepts is explained and discussed with reference to professional and legal norms. The discussion is then supplemented by case studies that exemplify the relevant concepts and show how each applies in health care and nursing practice. This new fourth edition includes an added chapter on end-of-life issues and it is revised throughout to reflect the latest developments on topics such as global health, ethics, cultural competence, social media, and palliative sedation, as well as ethical issues relating to COVID-19.
