an accessible introduction to ethics through engaging dialogues talking about ethics provides the reader with all of the tools necessary to develop a coherent approach to ethical decision making using the tools of ethical theory the authors show how these theories play out in relation to a wide variety of ethical questions using an accessible dialogue format the chapters follow three college students as they discuss today's most important ethical issues with their families and friends including immigration capital punishment legalization of narcotics abortion premarital sex reproductive technologies gender identity the environment and many more the engaging dialogue format illustrates how these topics often take shape in the real world and model critical thinking and christian ethical decision making study aids in each chapter include overviews sidebars reflection questions glossaries and recommended reading ideal as a textbook for undergraduate ethics courses it is also accessible enough for high school classes and personal study

examining the cases of Iani Guinier, Hillary Rodham Clinton, and Janet Reno, the authors explore the rhetorical choices contemporary women are making in political discourse. They frame this exploration theoretically by describing three moral boundaries that discourage women from entering political life: the boundary between morality and politics, the moral point of view boundary, and the boundary between public and private life. Guinier, Clinton, and Reno have each adopted different strategies in confronting these boundaries, and their strategies dramatically illustrate the communication of contemporary political women.

A case-based approach to learning ethics in physical therapy. Ethics in physical therapy utilizes a unique case-based approach to teach students and clinicians how to apply theoretical concepts to real-world situations. The cases were carefully selected to encourage thinking and discussion. The accompanying text provides a framework to answer the "should" questions such as "what should I do" and "how should I act." The format provides the opportunity to move beyond the individual realm when appropriately resolving issues within an institutional or societal perspective. The text is divided into two sections: ethics for the physical therapist and types of ethical decisions. Case analysis: they are designed to integrate with one another, but each section can also be used separately. Part I provides more didactic foundational material, while Part II strives to apply ethical decision-making tools to relevant cases in physical therapy practice. The second section focuses on case analyses. The purpose of ethics in physical therapy is to give students and clinicians a lens through which to analyze contemporary ethical challenges. Philosophical theory within the text is limited to that which can be applied practically in the clinical setting. This book is not intended to be a work on ethical behavior; rather, it is designed to provide students and clinicians with a framework in which to approach the uncertainty of ethical decision-making with tools to aid their inherent judgment.

Filled with current examples and ideal for a full or part course on ethics, this text provides the foundation needed to make appropriate decisions when faced with ethical situations in the field of information technology.

Includes section book reviews

In this book, J. Philip Wogaman presents his belief that in the uncertainty surrounding most moral questions, religious faith makes a difference. In one sense, ethics he explains how Christian character is fundamental to decision-making and that it is possible to arrive at judgments on today's complex moral problems in light of Christian faith. This book includes chapters on the centrality of moral character and virtue, as well as on the contribution of theology to ethics. From the publisher's description:
