collaborative practice in palliative care explores how different professions work collaboratively across professional institutional social and cultural boundaries to enhance palliative care analysing palliative care as an interaction between different professionals clients and carers and the social context or community within which the interaction takes place it is grounded in up to

date evidence includes global aspects of palliative care and cultural diversity as themes running throughout the book and is replete with examples of good and innovative practice drawing on experiences from within traditional specialist palliative care settings like hospices and community palliative care services as well as more generalist contexts of the general hospital and primary care this practical text highlights the social or public health model of palliative care designed to support active learning it includes features such as case studies summaries and pointers to other learning resources this text is an important reference for all professionals engaged in palliative care particularly those studying for post qualification programmes in the area

it has been a true pleasure to have had the opportunity to peruse the second edition of palliative care nursing this book authored predominately by uk based experts succeeds in presenting sophisticated thoughts in readily accessible language each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text i have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing literature carol tishelman karolinska institutet stockholm sweden i find palliative care nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care the book is voluminous informative and educationally well constructed frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his her family as a skilled companion this book gives the possibility for nurses to spread one clear voice about palliative care nursing congratulations to all the authors martine de vlieger palliatieve hulpverlening antwerpen v z w university of antwerp belgium this book should be compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life it provides a comprehensive account of the major issues clinical professional sociological and political that confront contemporary palliative care while also offering strategies to move forward the real world of palliative care is described and critiqued and the rhetoric is dispensed with this book is a vital resource for nursing practice learning and teaching associate professor peter hudson rn phd director of the centre for palliative care research and education st vincent s hospital and the university of melbourne australia this is an excellent book for anyone completing either an academic qualification or who wants to understand the who what and where of palliative care both in the uk and abroad its detail is balanced with case studies and practical illustrations that bring the academic nature of

its writing to life for reference purposes for anyone completing academic work it has to be an absolute must nursing times the second edition of this innovative textbook has been extensively revised and updated to reflect new global developments in palliative care this textbook reviews current research and examines the evidence base for palliative care policy and practice over a third of the chapters are newly commissioned from leading international contributors building on the widely acclaimed original edition the textbook focuses on palliative care for adults in a variety of care environments the first three sections use a novel framework the trajectory of life limiting illness to cover key issues including what happens to people as they become ill how individuals cope as they near death and are dying how families and friends deal with bereavement and loss the final section addresses contemporary issues in nursing and inter professional working the book is written with helpful overviews and in an informative and reader friendly style there are numerous examples of clinical situations and research studies which are examined in depth to illustrate debates in palliative care the textbook spans the range of end of life contexts which are of relevance to practitioners educationalists and researchers palliative care nursing is essential reading for post qualification nursing students and all nurses and health and social care professionals who provide care to people with advanced illness and those who are near the end of life this broad ranging critical text will be invaluable to students and practitioners working with people and their families near the end of life

a team of two practitioners in psychosocial palliative care and an academic have drawn together the work of twenty eight highly experienced practitioners good practices in palliative care a psychosocial perspective provides detailed descriptions of innovative practices and how they were developed together with clear practice principles this unique contribution to palliative care literature is suitable for a wide range of health and social care professionals at student and experienced levels and is written in a user friendly style

this second edition provides the most up to date information on all aspects of palliative care including recent developments including covid 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care this new textbook of palliative care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art palliative care has been part of healthcare for over fifty years but it still needs to be explained to many healthcare education and training has been

slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families however the science of palliative care is advancing and this new edition will contribute to a better understanding this new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be we present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care the textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care emergencies ethics public health approaches and research in palliative care this new textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important specialists as well as non specialists in any setting where people with serious advanced illnesses are residing it is also an important resource for researchers policy and decision makers at national or regional levels neither the science nor the art of palliative care will stand still so the editors and contributors from all over the world aim to keep this textbook updated so that the reader can find new evidence and approaches to care

series editors moira stewart judith belle brown and thomas r freeman as the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care this book gives guidance on how to approach patients with life limiting illness while the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes for issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people palliative care offers a fresh look at the management of patients with international evidence based contributions the book suggests practical and challenging ways to care for the dying it is ideal for all healthcare professionals working in palliative care general practitioners and medicine and healthcare students

do you need a succinct introduction to the key theories and principles of palliative care and their application to practice key concepts in palliative care provides just this in a compact fifty concept guide to the field taking account of the government s end of life care strategy contributors set out

the key issues affecting practice across a range of health and social care contexts the book covers topics ranging from dying and death to symptom management and spiritual care backed up with practical examples each entry comprises o a snapshot definition of the topic o key points o a discussion of the main debates o links to practice through thought provoking case histories and o suggestions for further reading key concepts in palliative care is an ideal text and handy source of reference for health and social care professionals who are developing their knowledge and skills in palliative care

annotation offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease this resource is organized around 15 competencies in palliative care developed by the american association of colleges of nursing with each chapter outlining specific skills needed to achieve each competency

this book encourages health professionals to reconceptualise their practice in the light of the fact that their patients are deteriorating and dying supporting them in their dichotomous role which involves affirming that person s life whilst acknowledging that that life is ending professionals are encouraged to think laterally to be creative in their use of their core skills and to use their life skills and experience to change the focus of their interventions by making these changes those involved with caring for the dying will be able to address issues related to burnout and feeling de skilled the authors share their considerable experience with the reader what works for both patient and carer professional when working in this field by providing workable solutions they empower those in disempowering situations such as when working with terminally ill children and adults the book is truly holistic and client centred in its approach upholding the philosophy of palliative care aimed at all who interact with children and adults who have a life limiting condition or who are dying offers practical examples of approaches to dilemmas and emotional issues commonly face by those working in palliative care encourages professionals to think laterally to be creative in their use of core skills and to use their life skills and experience to change the focus of their interventions moves the emphasis away from the medical model to the emotional and spiritual influences on quality of life offers clear workable guidelines and demonstrates practical solutions based on proven theory and experience to problems encountered on a day to day basis by patients and those coming into contact with them

current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25 30 of people over the age of 85 will show some degree of

cognitive decline palliative care for older people a public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers the book begins by outlining the range of policies towards palliative care for older people that are found worldwide it follows this by examining an array of socio cultural issues and palliative care initiatives from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people palliative care for older people a public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world the book also highlights the social cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational regional national and international levels

this book discusses the serious consequences of experiences of death and dying both for the dying and their family members and the family members grief work and health after the death of their loved ones the book will also present a health promotion perspective of palliative care patients their families and healthcare workers all approaches to patients and their families must be based on individual contexts and frameworks and should be adjusted accordingly the possibility of following up with the bereaved after the death of their loved ones as an important health promotion intervention the healthcare workers in palliative care are subject to different stressors than other medical professionals and the priorities are not the same as in other settings ultimately fulfilling the patient s wishes as well as their needs is essential

this book is designed to provide a comprehensive insight unto the key and most prevalent contemporary issues associated with palliation the reader will find viewpoints that are challenging and sometimes discerning but at the same time motivating and thought provoking in the care of persons requiring palliation this book is divided into three sections section 1 examines contemporary practice section 2 looks at the challenges in practice section 3 discusses models of care this book is an excellent resource for students practising clinicians and academics by reading the book reflecting on the issues challenges and opportunities ahead we hope it will create within the reader a passion to take on explore and further develop their palliative care

practice

praise for the third edition in this comprehensive textbook on palliative care nursing editors marianne matzo and deborah witt sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice geripal this fourth edition of a comprehensive text reference that has been valued by students educators and practicing nurses for many years palliative care nursing continues to reflect the fundamental hospice and palliative care nursing competencies both basic and advanced that are essential for effective and empathetic care of patients and families this new edition reflects the tremendous growth of this vital discipline into the mainstream of health care and focuses on palliative care that is responsive to the demand for health care reform in america and globally it provides the knowledge scientific evidence and skills needed by nurses to address the complex physical emotional social sexual and spiritual needs of patients and families within the context of a changing health care delivery system with a focus on inter professional collaboration the book emphasizes the value of complementary holistic models in promoting health and wholeness across the illness trajectory even as death approaches the book is edited by project on death in america faculty scholars who have worked to develop implement and evaluate nursing initiatives in palliative care in the u s and internationally with a focus on both quality of life and economic imperatives interdisciplinary authors describe the management of specific diseases and related physical and psychological symptoms and care of patients during the dying process they cover assessment of key symptoms and pharmacological non pharmacological and complementary interventions taking a life span approach the book includes age appropriate nursing considerations key points at the beginning of each chapter and callouts containing evidenced based information highlight best practices the text also examines relevant legal ethical and cultural considerations and offers case studies with conclusions in each clinical chapter new to the fourth edition thoroughly revised and expanded three new chapters addressing palliative care amidst health care reform rehabilitation in chronic or serious illness and post traumatic stress disorder a conceptual framework table in each chapter identifying the national quality forum domains of palliative care and basic and advanced palliative care and hospice nursing competencies updated evidence based callouts that review the highest quality studies

use of the arts in palliative care settings is a powerful and effective way of addressing the practical psychological social and spiritual issues faced by service users in end of life care this book uncovers the possibilities for using the creative arts and provides guidance on how to

implement arts projects successfully

the rapidly evolving field of palliative care focuses on the management of phenomena that produce discomfort and that undermine the quality of life of patients with incurable medical disorders the interdisciplinary clinical purview includes those factors physical psychological social and spiritual that contribute to suffering undermine the quality of life and prevent a death with comfort and dignity palliative care is a fundamental part of clinical practice the parallel universe to therapies directed at cure or prolongation of life all clinicians who treat patients with chronic life threatening diseases are engaged in palliative care continually attempting to manage complex symptomatology and functional disturbances the scientific foundation of palliative care is advancing and similarly methods are needed to highlight for practitioners at the bedside the findings of empirical research topics in palliative care series is divided into sections that address a range of issues addressing aspects of symptom control psychosocial functioning spiritual or existential concerns ethics and other topics the chapters in each section review the given area and focus on a small number of salient issues for analysis the authors present and evaluate existing data provide a context drawn from clinical and research settings and integrate knowledge in a manner that is both practical and readable the specific topics covered in volume 5 are cultural issues in palliative care palliative care in geriatrics communication issues in palliative care outcomes research in palliative care opioid tolerance reality of myth and pain and other symptoms treatment challenges

the oxford handbook of palliative care returns for a third edition maintaining the concise yet comprehensive format suited to the busy practitioner for quick access to key information and fully updated to reflect changes in the palliative care landscape featuring an increased emphasis on non malignant diseases such as dementia this authoritative text combines evidence based care with the bedside experience of experienced palliative care professionals to give the reader a complete overview of the physical emotional and spiritual aspects of care for the end of life patient symptom management is covered in detail with updated formulary tables and syringe driver protocols and a new chapter on international perspectives to broaden the reader's perception of methods for delivering end of life care the third edition of the oxford handbook of palliative care is the essential companion for all of those working with adults children and families with palliative care needs in both hospital and community settings the following correction has been made online and will be included in the first reprint readers can get in touch with us directly using the contact details on the back of the book or at our online form via the address below with

questions or comments globaloup.com/academic/category/medicine-and-health/chapter/5/page/109 the dose for hyoscine butylbromide sc has been amended in line with nice guidance bnf.nice.org.uk/drug/hyoscine-butylbromide.html 20 120 mg 4 hourly has been corrected to 20 80mg 4 hourly

doctors nurses and all healthcare professionals dealing with patients with advanced and terminal disease will find this book essential reading

this new and expanded edition is aimed directly at the learning needs of student nurses and is unique in that context whilst there are many high quality books available for academic study in palliative care this is currently the only one that balances a strong educational focus for developing nursing practice with an understanding of the particular needs of student nurses the text maintains a sensitive and supportive approach to the key themes of palliative care nursing but contains important new material of a wide range of initiatives that are impacting on end of life care across the uk it will provide the reader with a concise easy to read and learning oriented text that will give advice and direction to the many challenges faced in this most important area of patient care each chapter examines a key component of care and new features include learning outcomes at the start of each chapter to guide the reader clinical anecdotes to illustrate the reality and complexity of practice extensive use of recognisable symbols to guide the reader and improve the usability of the text competency assessment to help gauge knowledge and progress reflective points to aid professional development reflective activities to enable the student to reinforce learning from practice links to appropriate clauses of the current 2008 nmc code of professional conduct quality internet resources relevant to chapter content self assessment multiple choice tests at the end of each chapter to consolidate learning an extensive palliative care quiz covering the main topic areas of the book to test knowledge this can be used as evidence with professional portfolios

education is key to developing a strong base for the future of palliative care and this book provides a wide ranging global view of palliative care education it offers theoretical and practical insights along with specific suggestions for developing knowledge and skills for teaching

this exceptional work explores the complexities of communication at one of the most critical stages of the life experience during advanced serious illness and at the end of life challenging the predominantly biomedical model that informs much communication between seriously ill and or dying patients and their physicians caregivers and families *sandra l ragan elaine m wittenberg*

lyles joy goldsmith and sandra sanchez reilly pose palliative care medical care designed to comfort rather than to cure patients as an antidote to the experience of most americans at the most vulnerable juncture of their lives with an author team comprised of three health communication scholars and one physician certified in geriatrics and palliative medicine this volume integrates the medical literature on palliative care with that of health communication researchers who advocate a biopsychosocial approach to health care applying communication theories and insights to illuminate problems and to explain their complexities the authors advocate a patient centered approach to care that recognizes and seeks to lessen patients suffering and the many types of pain they may experience physical psychological social and spiritual during life threatening illness

what can nurses do to support those receiving palliative care how do you ensure clear communication and maintain patients and families preferences palliative care nursing is essential reading for nursing students professional nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life this third edition of the acclaimed textbook has been extensively revised and examines important research studies key debates around care and strategies to advance palliative care nursing in four sections the book covers key elements of nursing practice towards the end of life defining the palliative care patient providing palliative nursing care caring around the time of death challenging issues in palliative care nursing leading authors address contemporary issues and explore how to provide high quality person centred palliative care encouraging application to practice through exercises and case studies chapters completely reworked or new for this edition include those on communication living with uncertainty bereavement care the costs of caring nurses decision making and capacity and palliative care worldwide the clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre registration level postgraduate level or as part of cpd study with a foreword by last edition editor professor sheila payne lancaster university uk i welcome this third edition of palliative care nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice as the largest workforce in palliative care and given the changing face of clinical practice for nurses including increased educational opportunity and expanding roles and responsibilities this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline the learning exercises in particular offer tools for educators and

clinicians to reflect on practice and understand new ways of knowing in palliative care it will be an excellent resource for nursing both in the uk and ireland and to the wider international audience having drawn on the breadth of global nursing expertise to bring this book together philip larkin professor of clinical nursing palliative care university college dublin and our lady s hospice and care services dublin ireland president european association for palliative care this is a book of substance that captures the current status of palliative nursing including the values and research evidence that underpin it the changing nature of palliative nursing as an evidence based specialism is balanced with practical skills and insights from experts and also considers the needs of those working with or concerned about the dying person s well being it covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis i hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing professor daniel kelly fellow of the royal college of nursing and royal college of nursing chair of nursing research cardiff university uk
