the first book on clinical guide to transplantation in lymphoma to present cutting edge knowledge on how to integrate transplantation and novel therapies in patients with

lymphoid malignancies provides practical management guidance on how to integrate transplantation and novel therapies in patients with lymphoid malignancies covers an overview of transplantation in lymphoma and management of the lymphoid malignancies discusses organizational aspects of transplant patients and managing a transplant program appendices provide practical quick reference information on follow up after autologous and allogenic stem cell transplantation in lymphoma

the dramatic race to transplant the first human heart spanned two years three continents and five cities against a backdrop of searing tension scientific brilliance ethical controversy racial strife and emotional turmoil it culminated in a terrifying moment in the early hours of 3 december 1967 when in a cramped operating theatre in a cape town hospital professor chris barnard stared into an empty cavity from which he had just removed a heart he knew that he had only minutes left to make history and save the life of a 55 year old man by filling the gaping hole in his chest with a heart which had just been beating inside a 25 year old woman every second countsis the story of this gripping race to conquer the greatest of medical challenges it also reveals the truth about the man at the centre of it all whose turbulent life story was just as gripping the kind of true story that would be dismissed as far fetched if presented as fiction it combines an utterly compelling portrait of cutting edge science with raw human drama and shows how the course of medicine itself was changed for ever

brought to you by the world s leading transplantclinicians textbook of organ transplantation provides acomplete and comprehensive overview of modern transplantation inall its complexity from basic science to gold standard surgicaltechniques to post operative care and from likely outcomes toconsiderations for transplant program administration bioethics andhealth policy beautifully produced in full color throughout and with over 600high quality illustrations it successfully provides a solid overview of what transplantclinicians surgeons do and with topics presented in an order thata clinician will encounter them presents a holistic look at transplantation foregrounding theinterrelationships between transplant team members and non surgicalclinicians in the subspecialties relevant to pre andpost operative patient care such as gastroenterology nephrology and cardiology offers a focused look at pediatric transplantation andidentifies the ways in which it significantly differs fromtransplantation in adults includes coverage of essential non clinical topics such as atransplant program management and administration research designand data collection transplant policy and bioethical issues textbook of organ transplantation is the market
