this book is an introductory text to the field of psychological testing primarily suitable for undergraduate students in psychology education business and related fields this book will also be of interest to graduate students who have not had a prior exposure to psychological testing and to professionals such as lawyers who need to consult a useful source psychological testing is clearly written well organized comprehensive and replete with illustrative materials in addition to the basic topics the text covers in detail topics that are often neglected by other texts such as cross cultural testing the issue of faking tests the impact of computers and the use of tests to assess positive behaviors such as creativity

this book examines the cause of the student achievement gap suggesting that the prevailing emphasis on socioeconomic factors sociocultural influences and teacher quality is misplaced the cause of the achievement gap is not differences in parenting styles or the economic advantages of middle class parents or differences in the quality of teachers instead schools present learning tasks and award grades in ways that inadvertently undermine the self efficacy engagement and effort of low performing students causing demoralization and exacerbating differences in achievement that are seen to exist as early as kindergarten this process systematically maintains and widens initial gaps in achievement that might otherwise be expected to disappear over the k 12 years misdiagnosis of the nature of the achievement gap has led to misguided solutions the author draws upon a range of research studies to support this view and to offer recommendations for improvement div div

the chapters that follow are an attempt to select the significant and vital findings in educational research in science teaching and apply these studies in terms of classroom experience
