a provocative and often insightful volume the book s central chapters describe in illuminating detail how the results of recent excavations affect our understanding of three major issues and periods in the history of israel dever s firsthand knowledge of the material is everywhere apparent and his presentation of important new data is characteristically lucid biblical archaeology review

this multidisciplinary study takes a fresh look at judean history and biblical literature in the late fourth and third centuries bce in a major reappraisal of

this era the contributions to this volume depict it as one in which critical changes took place until recently the period from alexander s conquest in 332 bce to the early years of seleucid domination following antiochus iii s conquest in 198 bce was reputed to be poorly documented in material evidence and textual production buttressing the view that the era from late persian to hasmonean times was one of seamless continuity biblical scholars believed that no literary activity belonged to the hellenistic age and archaeologists were unable to refine their understanding because of a lack of secure chronological markers however recent studies are revealing this period as one of major social changes and intense literary activity historians have shed new light on the nature of the hellenistic empires and the relationship between the central power and local entities in ancient imperial settings and the redating of several biblical texts to the third century bce challenges the traditional periodization of judean history bringing together hellenistic history the archaeology of judea and biblical studies this volume appraises the early hellenistic period anew as a time of great transition and change and situates judea within its broader regional and transregional imperial contexts

this book provides a critical overview of analytical methods used for the determination of pesticide residues and other contaminants in food and environmental samples by modern instrumental analysis it contains up to date material including recent trends in sample preparation general methods used for pesticide analysis and quality assurance aspects and chromatographic and immunoassay methods the rest of the book describes particular analytical methods used for the determination of pesticides in food and soil water and air in addition the levels of these chemicals found in food their regulatory aspects and the monitoring of pesticides in the environment are described

a collection of the best articles from israel exploration journal vols 1 25 1951 1975

reprint of the original first published in 1883 the antigonos publishing house specialises in the publication of reprints of historical books we make sure that these works are made available to the public in good condition in order to preserve their cultural heritage

the printed version contains the following fields author year title journal volume and page numbers accompanying the hard copy are computer disks with seven fields author year title journal volume and page numbers and key words and the source also included is a documented list of the 4000 journals which appear in the bibliography as well as a key to the source for each citation the disks can stand alone but the printed version requires the disks for searching
