dr a d morris had a long interest in and great familiarity with the life and times of james parkinson 1755 1824 he was an avid collector of material related to parkinson some of which he communicated to medical and historical groups and which he also incorporated into publications especially his admirable work the hoxton madhouses when dr morris died in 1980 he left behind a large typescript devoted to parkinson s life it was single minded in its dedication to primary texts quoting liberally from the whole range of parkinson s writings this was particularly valuable since so many of parkinson s publications were tracts pamphlets or occasional pieces which are now very scarce a copy of the entire manuscript has been deposited in the library of the

well come institute for the history of medicine in london where it may be consulted the length of the manuscript made publication of the whole impossible especially since it would have had to include the facsimile reproduction of morris s the hoxton madhouses

geology coalesced as a discipline in the early part of the nineteenth century with the coming together of many strands of investigation and thought the theme of experimentation and or instrument aided observation is absent from most recent accounts of that time which rely on an admixture of theory and field observations informed by close examination of minerals james hutton emerged as the person who had it right with suggestion of a central heat source for earth while abraham gottlob werner and his neptunist supporters were derided as being blinded by overarching belief as opposed to sober application of observed facts however despite several claims that hutton had won the day primary literature from both england and the continent reveals that the question was by no means settled for decades after hutton derided information derived from looking into a little crucible this special paper makes the case that it was just those parameters of heat pressure solution and composition discovered in the laboratory that prevented resolution of the overriding questions about rock origin
