the experiments have been classroom tested through multiple semesters they are proven to work and can be completed in a

normal lab period alternate versions of experiments allow for easy use in labs which meet once a week or multiple times a week the manual also makes it easy for students to use due to six tip boxes located throughout the text which give pointers on how to perform the labs and six essential information boxes that highlight pertinent information there are also references and further reading sections located at the end of each chapter

this real world approach allows students to come away with a realistically informed view of the basis for much of our understanding of nutritional biochemistry

the techniques covered range from the extraction separation detection and characterization of nucleic acids to gene cloning and library production mapping expression transgenesis differential display and dna profiling to name a few numerous key protein methods as well as support and related techniques are also included
