this book provides the first attempt to measure european business performance over the twentieth century the book s findings confirm and inform widely held assumptions regarding business performance regarding strategy and structure ownership and control old and new industries emerging and advanced economies

we evaluate the performance of u s investors international portfolios over a 25 year period portfolio returns are formed by first estimating monthly bilateral holdings in 44 countries using high quality but infrequent benchmark surveys that enable us to eliminate the geographical bias in reported capital flows data in their foreign equity portfolios u s investors achieved a significantly higher sharpe ratio than global benchmarks especially since 1990 we uncover three potential reasons for this success first they abstained from returns chasing behavior and instead sold past winners second conditional performance tests provide no evidence that the superior unconditional performance owed to private information suggesting that the successful exploitation of publicly available information played a role third well documented preferences for cross listed and well governed foreign firms appear to have served u s investors well we also evaluate the unconditional performance of bond portfolios about which less information is available and find that u s investors achieved higher sharpe ratios than global benchmarks although the difference here is not statistically significant federal reserve board web site

reports for 1980 19 also include the annual report of the national council on the arts

cases argued and determined in the court of appeals supreme and lower courts of record of new york state with key number annotations varies
