excerpt from market analysis its principles and methods every business is concerned chiefly with two things first with producing a commodity and second with marketing it this book aims to describe the latter function originally a market was the actual place

where the exchange of one commodity for another took place since at that time there was no money trading was done by a system of barter by which the superfluous commodities of one man were exchanged for those of his neighbor although markets have changed greatly in outward semblance since then the fundamentals remain unaltered a market is still nothing more nor less than an opportunity to buy or sell the great difference lies in the methods of locating the market supply ing it with commodities and securing payment for them mar kets have ceased to be local assemblies or fairs held at some crossroads or other central location a modern market is limited in scope only by the number of possible users of the product throughout the world the introduction of money improve ments in transportation the rise of manufacturing and many other factors have tended to specialize and complicate the original simplicity of the marketing function about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from market analysis its principles and methods the purpose of this book is to serve as a guide for the manufacturer sales manager engineer advertising agency and others interested in the scientific analysis and organization of markets although addressed primarily to business executives it is hoped that the book also will prove of value to the professional market surveyor as well as to the student who believes that in the coming business era scientific methods will be applied to distribution as they were to production in the past era although an attempt has been made to give the somewhat casual reader an adequate perspective of market analysis the book is arranged so as to give the actual investigator all instructions necessary to the conduct of his work at the beginning of each chapter an outline is given of its content this outline is in question form it is of course impossible to devise a set of questions directly applicable to any and every business yet it will be safe for the surveyor to assume that by the time he is able to give intelligent answers to these key questions he has in hand all the material necessary for a complete report on his market the chapters and in so far as possible the headings under each chapter have been arranged according to the surveyors logical course of procedure rather than with any attempt at a theoretical or merely pedagogical presentation of the subject about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
