this advanced textbook covers issues of family ties and aging broadly the goal being to provide an integrated and thorough representation of what we know from the current research whereas books on families and aging have traditionally focused on ties to a spouse and to children and grandchildren family ties aging is more extensive and more reflective of contemporary society the text includes groups and relationships that typically receive short shrift exploring such neglected populations as single divorced and childless older people and their family relationships as well as sibling relationships among the elderly live in partnerships not formalized by marriage and the kinds of family ties forged by gay and lesbian persons over the life course the book weaves the vast range of information we now have about the many facets of family relationships and aging into a critical comprehensive and integrated whole

this volume engages the interface between the development of human lives and social relational networks it focuses on the integration of two subfields of sociology social science the life course and social networks research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks at the same time life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and linked to one another through social networks these patterns are changing and this book creates an audience of researchers who will better integrate the two subfields it covers the role of social networks across the life span from childhood and adolescence to midlife through old age
