in this 2007 volume eighteen of the world's leading scholars present original essays on various aspects of atheism its history both ancient and modern defense and implications the topic is examined in terms of its implications for a wide range of disciplines including philosophy religion feminism postmodernism sociology and psychology in its defense both classical and contemporary theistic arguments are criticized and the argument from evil and impossibility arguments along with a non religious basis for morality are defended these essays give a broad understanding of atheism and a lucid introduction to this controversial topic

this book offers the first detailed comparative study of the seven best documented early civilizations ancient egypt and mesopotamia shang china the aztecs and adjacent peoples in the valley of mexico the classic maya the inka and the yoruba unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture many of this study's findings are surprising and provocative agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected these findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology the key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour
