design is a growing and important field these days of course in order to excel as a designer you need to be deeply in touch with your creativity being a designer involves looking at something a different way from how everyone else looks at it but just how do you learn to do that and what do you know when you're a creative person but your creative juices just aren't flowing that's where the advice of the design book a guide book for designers comes in a design book is actually a two volume collection including two very popular books on creativity and innovation by acclaimed business author can akdeniz the set includes go nuts the art of creativity and innovation and kill the normal the secrets of revolutionary designs

first and foremost this is a booklet to explore printing with createspace secondarily it displays a few chapter opening treatments as a possible starting off point for authors and clients of personal historians to get a sense of how their book might look on the page following each chapter opening here you will find noted the size of that book along with a large letter labelling that design if for some reason you'd like to refer to it in the chapter entitled images of various resolutions i am exploring how black and white color and false duotone images images created with cmyk that appear

as if they have been created using black and a second color print in create space using 300dpi 450dpi and 600dpi i created this first for my own benefit as a test using a casual design so that i might execute my own and clients books for createspace the best i can then my sister had the idea to also use this as a place to showcase a smattering of chapter openings as an offering for a less expensive design path as these have already been created hence part of the design time would be alleviated in any case i hope this book may be of use to you
