this book is about how to give outstanding feedback to patients their family members and other professionals effective feedback sessions have the potential to help patients understand their neurocognitive syndromes in the larger context of their real world environments and in a manner that positively alters lives as our profession has matured feedback sessions with patients and family members have become the norm rather than the exception nonetheless many senior and even mid career neuropsychologists were never explicitly taught how to give feedback and despite the burgeoning neuropsychological literature describing sophisticated assessment methods and neuropsychological syndromes there has been almost no parallel literature describing techniques for communicating this information to patients and other professionals this begs the question how have we learned to do

this extraordinary task well and how do we effectively communicate intrinsically complex assessment results to deliver the type of salient feedback that alters lives it turns out the answers are like feedback sessions themselves varied and complex feedback that sticks presents a compilation of the clinical feedback strategies of over 85 neuropsychologists from all over the country training directors members of tertiary medical teams and private practitioners it offers the reader the ability to be a fly on the wall as these seasoned neuropsychologists share feedback strategies they use with patients across the lifespan and who present with a wide variety of neurological and developmental conditions like receiving the best feedback training from 85 different mentors the book gathers the most compelling accessible ways of explaining complex neuropsychological concepts from a broad variety of practitioners through this process it offers a unique opportunity for practicing neuropsychologists to develop broaden and strengthen their own approaches to feedback

feedback that sticks is a compilation of the strategies and metaphors of over 85 senior neuropsychologists compelling accessible ways of explaining complex neuropsychological concepts to patients their family members and other professionals it provides a unique opportunity for practicing neuropsychologists to develop and strengthen their own approaches to providing feedback

since the earliest days of manned flight designers have to sought to assist the pilot in the performance of tasks by using stick and feel systems to bring these tasks within the bounds of human physical capabilities this volume describes stick and feel systems in two parts part one describes the technologies which have been developed throughout the history of 20th century aviation part two describes how modern systems dynamics interact with the human pilot it is hoped that the design lessons and approaches outlined in this volume will contribute to a better understanding and appreciation of the importance of force feel system design in aircraft rotorcraft flight control

published as a special issue of the journal mechanism machine theory

magical child a classic work profoundly questioned the current thinking on childbirth practices parenting and educating our children now its daring ideas about how western society is damaging our children and how we can better nurture them and ourselves ring truer than ever from the very instant of birth says joseph chilton pearce the human child has only one concern to learn all that there is to learn about the world this planet is the child s playground and nothing should interfere with a child s play raised this way the magical child is a happy genius capable of anything equipped to fulfill his amazing potential expanding on the ideas of internationally acclaimed child psychologist jean piaget pearce traces the growth of the mind brain from birth to adulthood he

connects the alarming rise in autism hyperkinetic behavior childhood schizophrenia and adolescent suicide to the all too common errors we make in raising and educating our children then he shows how we can restore the astonishing wealth of creative intelligence that is the birthright of every human being pearce challenged all our notions about child rearing and in the process challenges us to re examine ourselves pearce s message is simple it is never too late to play for we are all magical children

containing 4 plenary papers and 38 technical papers this volume contributes to the literature on the important subject of man machine systems the many topics discussed include human performance skills knowledge engineering and expert systems training procedures human performance and mental load models and human machine interfaces

this book provides an in depth coverage of the ergonomics of computer pointing devices it uses a human centered design perspective emphasizing the importance of human performance experimental research as a basis for both the evaluation of existing pointing devices and the design of new devices
