language and context breaks new ground in our understanding of the relationship between register genre and context leckie tarry argues convincingly and engagingly for a functional theory of language which specifies register in terms of contextual and linguistic features and which suggests a discursive relationship between the two moving beyond the limits of much of today s theory this accessible volume develops a theoretical understanding of the relationship between text context langage function and linguistic form helen leckie tarry a specialist in the area of register and applied linguistics died in 1991 aged 49 although she had finished a large part of this work her notes and draft chapters have been extensively edited by professor david birch david birch is currently professor of communication and media studies at central queensland university australia and previously taught at murdoch university western australia and the national university of singapore

in linguistic theory robert de beaugrande analyses linguistic theories not as abstract ideas or theses but as the process and product of theoretical discourse he argues that the best documentation of this discourse can be found in the fundamental works of major linguists from ferdinand de saussure to teun van dijk and walter kintsch he therefore employs the highly unusual strategy of a close reading of these works as discourse performances and strives to uncover their main points and characteristic moves in the linguist s own words through this approach the reader is able to appreciate and understand the variety and controversy among linguistic theories as they have emerged and developed in interaction with each other special scrutiny is allocated to the issue of how far the active practice of the linguists followed their own theories and proposals and why the author concludes by assessing the prospects for linguistics to be drawn from the retrospect in the previous chapters

the conference series going romance is the major european discussion forum for theoretically relevant research on romance languages where ideas about language and linguistics and about romance languages are put in an interactive perspective giving space to both universality and romance internal variation the current volume features a selection of 18 articles out of 28 that were presented during the 19th meeting at utrecht university december 8 10 2005 included in this volume are four papers that were presented by invited speakers belletti delais roussarie rialland notley van der linden hulk and ordóñez these reflect both issues discussed in the general session as well as themes of the workshop on acquisition a number of reknown romance linguists saltarelli di sciullo zubizarreta also contributed to the volume in general contributions bear on a variety of topics in the field of morphology syntax semantics and pragmatics and include the perspective from acquisition

the annual going romance conference is the major european discussion forum for theoretically relevant research on romance languages where current ideas about language in general and about romance languages in particular are tested starting with the thirteenth conference held in 1999 volumes with selected papers of the conferences are published under the title romance languages and linguistic theory this is the fifth such volume containing a selection of papers that have been presented at the seventeenth going romance conference held at the radboud university nijmegen the netherlands from

although there has been a significant revival in interest in bertrand russell s work in recent years most professional philosophers would still argue that russell was not interested in language here in the first full length study of russell s work on language throughout his long career keith green shows that this is in fact not the case in examining russell s work particularly from 1900 to 1950 green exposes a repeated emphasis on and turn to linguistic considerations green considers how linguistics and philosophy were struggling in the twentieth century to define themselves and to create appropriate contemporary disciplines they had much in common during certain periods yet seemed to continue in almost total ignorance of one another this negative relation has been noted in the past by roy harris whose work provides some of the inspiration for the present book taking those two aspects green s aim here is to provide the first full length consideration of russell s varied work in language and to read it in the context of developing contemporary i e with russell s work linguistic theory the main aims of this important new book in focusing exclusively on russell s work on language throughout his career are to place russell within the changing contexts of contemporary linguistic thought to read russell s language theories against the grain of his own linguistic practice to assess the relationship between linguistic and philosophical thought during russell s career and to reassess his place in the history of linguistic thought in the twentieth century as such this fascinating study will make a vital contribution to russell studies and to the study of the relationship between philosophy and linguistics

this volume presents a selection of the best papers from the 2000 going romance conference held in utrecht the papers discuss current topics in formal syntax in romance languages

### linguistic theory in america

from being the occupation of a marginal and frequently marginalised group of researchers the linguistic analysis of machine readable language corpora has moved to the mainstream of research on the english language in this process an impressive body of results has accumulated which over and above the intrinsic descriptive interest it holds for students of the english language forces a major and systematic re thinking of foundational issues in linguistic theory corpus linguistics and linguistic theory was accordingly chosen as the motto for the twentieth annual gathering of icame the international computer archive of modern medieval english which was hosted by the university of freiburg germany in 1999 the present volume which presents selected papers from this conference thus builds on

previous successful work in the computer aided description of english and at the same time represents an attempt at stock taking and methodological reflection in a linguistic subdiscipline that has clearly come of age contributions cover all levels of linguistic description from phonology prosody through grammar and semantics to discourse analytical issues such as genre or gender specific linguistic usage they are united by a desire to further the dialogue between the corpus linguistic community and researchers working in other traditions thereby the atmosphere ranges from undisguised skepticism as expressed by noam chomsky in an interview which is part of the opening contribution by bas aarts to empirically substantiated optimism as for example in bernadette vine s significantly titled contribution getting things done

written by two of the foremost researchers in the field the book benefits from their insight into conceptual issues their understanding of experimentation and their own pioneering research

in a controversial look at the study of linguistics today mortéza mahmoudian examines twentieth century theories of language in light of empirical evidence in the past linguists have had to choose between a general linguistic theory aimed at universal explanatory power and specific limited linguistic models arguing that at various levels of linguistic analysis different theories offer more or less explanatory power mahmoudian makes a persuasive case for an integrated approach incorporating the strengths of both methods the author begins with the identification of principles which despite differences in terminology are held in common by most twentieth century linguists he shows the implications merits and shortcomings of the major schools of linguistic thought as well as the techniques one can use in gathering data ranging over a wide variety of international linguistic thinking mahmoudian takes up the question of what he calls experimentation or the extent to which the application of certain linguistic theories have validity in constructing models simultaneously a survey of the current state of linguistic theory and a case for the necessity of empirical verification in linguistics modern theories of language builds a bridge across the gulf between many long standing conflicts in the theory of language accessibly written this provocative work predicts future theoretical and epistemological developments and will prove essential reading for students and scholars of linguistics as well as specialists in cognitive psychology and romance languages

this volume presents essays by some of the leading figures in the vanguard of theoretical linguistics within the framework of universal grammar one of the first books to adopt the minimalist framework to syntactic analysis it includes a central essay by noam chomsky on the minimalist program and covers a range of topics in syntax and morphology contributors luigi burzio hector campos noam chomsky joseph e emonds robert freiden james harris ray jackendoff paula kempchinsky howard lasnik claudia parodi carlos piera a carlos quicoli dominique sportiche esther torrego
