a field guide to eucalyptus trees for areas in australia from snow country to desert

over the last fifty years there has been an increasing recognition that eucalypts are vulnerable to a wide range of diseases they have suffered destructive epidemics particularly of dieback caused by the cinnamon fungus in native forests of foliar diseases and cankers in plantations and of dieback of remnant trees on agricultural and grazing land this has stimulated intensive research into the causes and management of diseases of the eucalypts this work represents a comprehensive review of our current knowledge of the health and diseases of eucalypts

a field guide to eucalyptus trees for areas in australia from snow country to desert

indexes literature on flowering plants that include color photographs or illustrations

prepared by the leading authorities on the eucalyptus species this new expanded edition will comprise the definite source for identification in south eastern australia first published in 1983 this new edition includes all new species recognised by the authors and many new colour plates

throughout all ages the activities of mankind have weighed heavily upon the environment in turn changes in that environment have favoured the rise of certain social groups and limited the actions of others despite this environmental history has remained a blind spot for most social and economic historians this is to be regretted as the various and unequal effects of environmental change often explain the strengths and weaknesses of certain social groups irrespective of their being defined along the lines of class gender and

ethnicity this volume brings together the expertise of social and environmental historians in an effort to assess the extent to which transnational agents changed socioecological space as a consequence of globalization since the late middle ages

conservation and sustainable productivity are vital issues for australia in order to manage vegetation well from an agricultural recreational or conservation point of view an understanding of individual plant species is important plants of central queensland provides a guide for identifying and understanding the plants of the region so that pastoralists and others can be better equipped to manage the vegetation resource of our grazing lands central queensland straddles the tropic of capricorn although many of the plants in the book will also be found outside this area as shown by their distribution maps the book provides information on the habit distribution foliage and fruits of 525 plant species informative notes highlighting declared poisonous weed and medicinal plants are included and plants useful for bees and bush tucker are also noted these are the most important plants you might see if you live in or travel through central queensland this book has an easy to read non botanical format with helpful photographs and distribution maps that greatly aid anyone interested in the vegetation of central queensland it is based on a previous work of the same title but is greatly expanded incorporating information on an additional 285 plant species

aboriginal and torres strait islander peoples are advised that this resource may contain images transcripts or names of aboriginal and torres strait islander peoples now deceased it may also contain historically and culturally sensitive words terms and descriptions
