Fundamentals of Corporate Finance, 8e, combines an applied introduction of concepts with a clear and strong focus on learning outcomes based on the principle that students' understanding of corporate finance should be developed in terms of a few integrated and powerful ideas. It has 3 basic themes at its core: 1. An emphasis on intuition. It separates and explains key principles on a common-sense, intuitive level before launching into specifics. The intuitive organisation of chapters also means that traditionally more difficult topics arise as a natural extension to the work that has gone before. 2. A unified valuation approach. Net present value (NPV) is treated as the basic concept underlying corporate finance. 3. A managerial focus. It emphasises the role of the financial manager as a decision maker and the need for managerial input and judgement. Up-to-date examples and cases in all chapters make the 8th edition a comprehensive manual of applied financial management covering financial hot topics and focus areas as well as a historic overview of developments in and lessons learned from equity and debt markets. Cases focusing on well-known ANZ and international companies show how recognisable organisations put corporate finance into practice and how real-world events such as the COVID-19 pandemic affect some of their corporate finance decisions. This new edition is even more flexible than its predecessors, offering flexibility of coverage to unit coordinators in designing their courses.
