the us armed forces were responsible for many tactical innovations during the years 1941 45 but in no field was us mastery more complete than amphibious warfare in the vast almost empty battlefield of the pacific the us navy and marine corps were obliged to develop every aspect of the amphibious assault landing in painstaking detail from the design of many new types of vessel down to the tactics of the rifle platoon hitting the beach and the logistic system without which they could not have fought their way inland this fascinating study offers a clear succinct explanation of every phase of these operations as they evolved during the war years illustrated with detailed color plates and photographs
