the relevance of language acquisition to the day to day concerns of teaching and learning languages

spolsky here examines the conditions under which languages are learned and how learning related to teaching his theory set out in the form of a preference model emphasizes the need to be precise and clear on the nature of the goals and outcomes of learning and to recognize the complexity of the concept of knowing a second language

the eleven chapters of vocabulary in a second language are written by the world's leading researchers in the field of vocabulary studies in second language acquisition. Each chapter presents experimental research leading to new conclusions about and insights into the selection, the learning and teaching or the testing of vocabulary knowledge in foreign languages. This book is intended as an up-to-date overview of the important domain of the lexicon for researchers in the field of second language acquisition, teacher trainers and professional teachers of second or foreign languages.

English language teaching (ELT), especially English as a second language (ESL) and English as a foreign language (EFL), has been witnessing unprecedented changes in curriculum, teaching methodology and the application of learning theories. This has created a demand for teachers who can teach English to learners of varied cultural, socio-economic and psychological backgrounds. The book in its second edition continues to discuss the modern trends, innovations as well as the difficulties and challenges in teaching and learning ESL in a non-native context. The book with contributions from many experts, each one specializing in a particular field from countries such as UK, USA, Australia, New Zealand, India, Nigeria, Sri Lanka, China and Japan, provides new methods, strategies and application-oriented solutions to overcome the problems in a practical way. The book deals with all topics pertinent to English as a second language or English for the non-native speakers and these are further reinforced by a large number of examples and quotations from different sources. The new edition comes along with thoroughly improvised chapters on narrative inquiry for teacher development (Chapter 13) and mass media, language attitudes and language interaction phenomena (Chapter 23) to provide an insight on the innovative approaches in teacher training and in classrooms and new approaches and changing language dimensions in the world of media and in general. What distinguishes the text is its focus on modern innovations and use of technology in ELT/CLT, communicative language teaching, postgraduate students of English, teachers, teacher trainees, B.Ed., M.A. Education, M.Ed. and teacher educators who are concerned with teaching English as a second language. ESL should find this book immensely helpful.

Whether we grow up with one, two or several languages during our early years of life, many of us will learn a second foreign or heritage language in later years. The field of second language acquisition (SLA) for short, investigates the human capacity to learn additional languages in late childhood, adolescence or adulthood after the first language. In the case of monolinguals or languages in the case of bilinguals, have already been acquired. Understanding second language acquisition offers a wide encompassing survey of this burgeoning field, its accumulated findings and proposed theories, its developed research paradigms and its pending questions for the future. The book zooms in and out of universal, individual and social forces in each case, evaluating the research findings that have been generated across diverse naturalistic and formal contexts for second language acquisition. It assumes no background in SLA and provides helpful chapter-by-chapter summaries and suggestions for further reading. Ideal as a textbook for students of applied linguistics, foreign language education, TESOL and education, it is also recommended for students of linguistics, developmental psycholinguistics, psychology and cognitive science supporting
