David S. Kidwell, Mark Brimble, Griffith University, Diana Beal, University of Southern Queensland, David Willis, University of Queensland, David W. Blackwell, David A. Whidbee, Richard L. Peterson. Financial Markets, Institutions, and Money introduces students to the Australian financial system and its financial operation. Increasingly, students who may not be undertaking a finance major are required to possess an understanding of financial markets and their role in business and macroeconomic activity. This new textbook will provide students with this knowledge as it offers a fresh, succinct analysis of the financial system, financial markets, and the types of financial intermediaries operating in Australia and the region. The Australian authors have endeavoured to ensure that the adaptation comprehensively reflects the characteristics, procedures, and influences of the local and regional financial markets rather than retain the pivotal focus of the US financial market. The adaptation details the Australian financial markets and those closer to Australia and the extent to which these markets are affected and determined by not only the giant US financial market but also the bullish growth markets of China and India. The text looks closely at the role of the RBA as the governing agency responsible for determining monetary policy, interest rates, and the way financial institutions adjust their operations to reduce risk caused by changes in the interest rate environment. The risks that financial institutions face and how these risks are managed are also discussed. New to this edition, an overview of the Australian financial system and how it facilitates the allocation of funds throughout the economy, discusses the types of financial institutions and markets in Australia, the benefits they provide to the economy, as well as the risks they face: interest rate risk, credit risk, liquidity risk, foreign exchange risk, and political risk. Consideration of terrorism and political risk and their impact on financial markets. Chapter 3, The RBA and Interest Rates, discusses the role of the RBA in measuring the money supply and influencing interest rates. The chapter also details the objectives of monetary policy. Features: Chapter Preview: Each chapter begins with a hypothetical situation in a particular capital market or financial institution that sets the scene for the chapter. The chapter will then make strategic references to the scenario presented to illustrate and apply the concepts. Chapter Road Map: Diagrammatically outlines the main topic headings presented in the chapter. In Focus: Chapter vignettes that profile a relevant issue, event, experience, development, way of thinking, comparative analysis, etc., that aims to link the discussion to real financial markets, therefore making the text applied and engaging for students. Illustrative Examples: Present key equations, calculations to reinforce understanding of the key mathematical procedures. Learning Check: Identifies and reinforces the key issues raised in each main section. End of Chapter Activities: Present a range of questions and problems that will develop the following student-centric skills: critical assessment, analysis, interpretation, internet research, awareness of mathematical processes, report writing, and communication, and an enhanced understanding of the complexities in financial

markets
