a major work of documentary history the brilliantly edited and annotated transcripts most of them never before published of the presidential conversations of lyndon b johnson regarding the kennedy assassination and its aftermath the transition from john f kennedy to johnson was arguably the most wrenching and ultimately one of the most bitter in the nation s history as johnson himself said later i took the oath i became president but for millions of americans i was still illegitimate a naked man with no presidential covering a pretender to the throne the whole thing was almost unbearable in this book max holland a leading authority on the assassination and longtime washington journalist presents the momentous telephone calls president johnson made and received as he sought to stabilize the country and keep the government

functioning in the wake of november 22 1963 the transcripts begin on the day of the assassination and reveal the often chaotic activity behind the scenes as a nation in shock struggled to come to terms with the momentous events the transcripts illuminate johnson s relationship with robert f kennedy which flared instantly into animosity the genuine warmth of his dealings with jacqueline kennedy his contact with the fbi and cia directors and the advice he sought from friends and mentors as he wrestled with the painful transition we eavesdrop on all the conversations including those with leading journalists that persuaded johnson to abandon his initial plan to let texas authorities investigate the assassination instead we observe how he abruptly established a federal commission headed by a very reluctant chief justice of the supreme court earl warren we also learn how johnson cajoled and drafted other prominent men among them senator richard russell who detested warren allen dulles john mccloy and gerald ford into serving we see a sudden president under unimaginable pressure contending with media frenzy and speculation on a worldwide scale we witness the flow of inaccurate information some of it from j edgar hoover amid rumors and theories about foreign involvement and we glimpse johnson addressing the mounting criticism of the warren commission after it released its still controversial report in september 1964 the conversations rendered here are nearly verbatim and have never been explained so thoroughly no passages have been deleted except when they veered from the subject brought together with holland s commentaries they make riveting hugely revelatory reading

karl pearson founder of modern statistics came to this field by way of passionate early studies of philosophy and cultural history as well as ether physics and graphical geometry his faith in science grew out of a deeply moral quest reflected also in his socialism and his efforts to find a new basis for relations between men and women this biography recounts pearson s extraordinary intellectual adventure and sheds new light on the inner life of science theodore porter s intensely personal portrait of pearson extends from religious crisis and sexual tensions to metaphysical and even mathematical anxieties pearson sought to reconcile reason with enthusiasm and to achieve the impersonal perspective of science without sacrificing complex individuality even as he longed to experience nature directly and intimately he identified science with renunciation and positivistic detachment porter finds a turning point in pearson s career where his humanistic interests gave way to statistical ones in his grammar of science 1892 in which he attempted to establish scientific method as the moral educational basis for a refashioned culture in this original and engaging book a leading historian of modern science investigates the interior experience of one man s scientific life while placing it in a rich tapestry of social political and intellectual movements

this book provides an accessible yet thorough introduction to special and general relativity crafted and class tested over many years of teaching suitable for advanced undergraduate and graduate students this book provides clear descriptions of how to approach the mathematics

and physics involved it is also contains the latest exciting developments in the field including dark energy gravitational waves and frame dragging the table of contents has been carefully developed in consultation with a large number of instructors teaching courses worldwide to ensure its wide applicability to modules on relativity and gravitation features a clear accessible writing style presenting a sophisticated approach to the subject that remains suitable for advanced undergraduate students and above class tested over many years to be accompanied by a partner volume on advanced topics for students to further extend their learning

since the first atomic weapon was detonated in 1945 Canadians have debated not only the role of nuclear power in their uranium rich land but also their country's role in a nuclear world the nuclear north investigates critical questions in these ongoing debates should Canada belong to international alliances that depend on the threat of using nuclear weapons for their own security should Canadian produced nuclear technologies be exported to potential proliferators does the country's championing of arms control and disarmament on the global stage matter what about the domestic costs of nuclear technologies and atomic research including their impact on local communities and the environment the contributors to this important collection consider how the atomic age has shaped Canadian policies at home and abroad their incisive assessment of the country's nuclear history engages with much larger debates about national identity Canadian foreign policy contradictions during the cold war and Canada's place in the international order

this updated second edition of notable twentieth century scientists provides biographies of approximately 1 600 scientist in the natural physical and applied sciences including astronomy biology botany chemistry earth science mathematics medicine physics technology zoology computer science ecology engineering and environmental science entries highlight name birth death dates nationality and primary specialization run from 400 2500 words list publications and feature a section of further reading all five volumes of the set begin with a list of entries and a chronology of major advances and volume five ends with several indexes based on the scientist's specialization gender nationality ethnicity and subject over 400 scientists garner photographs diversity and internationalism are hallmarks of the set suitable for high school and college c book news inc
