this book is about survival it is about survival in a world that is changing it is about survival in an occupation management that is almost unrecognizable from the viewpoint of only a few years ago and one that will change even more rapidly in the future it is about the ultimate survival tool that of making oneself useful managers can be useful but maybe not in the traditional sense this book is written for managers who want to be useful by adding value to society in the form of useful products and services it is not written for those who view personal advancement or wealth as their primary goal former speaker of the us house of representatives thomas p o neill was fond of saying all politics is local i would like to appropriate that statement and paraphrase it for this book as all management is local by that i mean that ultimately after the global financing and market strategies are in place and after the top level missions and purpose of the organization are stated the value added manager must know what to do on monday morning to get the product into the hands of the customer as quickly and efficiently as possible and to be sure that the customer is successful in using the product increasingly the top level executive who creates the grand vision is also the manager who must implement it

examines the realities of unexplained natural phenomenon and provides explanations that push the boundaries of science looks at animal telepathy and the ability of pigeons to home proves the point that big questions don t need big science noted scientist rupert sheldrake is a former research fellow of the royal society new edition with an update on results how does your pet know when you are coming home how do pigeons home can people really feel a phantom amputated arm these questions and more form the basis of sheldrake s look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test what sheldrake discovers is that certain scientific beliefs are so widely taken for granted that they are no longer regarded

as theories but are seen as scientific common sense in the true spirit of science sheldrake examines seven of these beliefs refusing to let intellectual dogmatism influence his search for the truth sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery his experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher's expectations can influence the results he also examines the taboo of taking pets seriously and explores the question of human extrasensory perception perhaps most important he questions the notion that science must be expensive in order to achieve important results showing that inexpensive methods can indeed shake the very foundations of science as we know it in this compelling and intelligent book sheldrake offers no preconceived wisdom or easy answers just an open invitation to explore the unknown create new science and perhaps even change the world
