this book clarifies several ambiguous arguments and claims in finance and the theory of the firm it also serves as a bridge between derivatives corporate finance and the theory of the firm in addition to mathematical derivations and theories the book also uses anecdotes and numerical examples to explain some unconventional concepts the main arguments of the book are 1 the ownership of the firm is not a valid concept and firms objectives are determined by entrepreneurs who can innovate to earn excess profits 2 the modigliani miller capital structure irrelevancy proposition is a restatement of the coase theorem and changes in the firm s debt equity ratio will not affect equity holders wealth welfare and equity holders preferences toward risk or variance are irrelevant 3 all firms resources are options and every asset is both a european call and a put option for any other asset and 4 that a first or residual claim between debt and equity is non existent while the first claim among fixed income assets can actually affect the market values of these assets

agency theory is a new branch of economics which focusses on the roles of information and of incentives when individuals cooperate with respect to the utilisation of resources basic approaches are coming from microeconomic theory as well as from risk analysis among the broad variety of applications are the many designs of contractual arrangements organizations and institutions as well as the manifold aspects of the separation of ownership and control so fundamental for business finance after some twenty years of intensive research in the field of information economics it might be timely to present the most basic issues questions models and applications this volume agency theory information and incentives offers introductory surveys as well as results of individual research that seem to shape that field of information economics appropriately some 30 authors were invited to present their subjects in such a way that students could easily become acquainted with the main ideas of information economics so the aim of agency theory information and incentives is to introduce students at an intermediate level and to accompany their work in classes on microeconomics information economics organization management theory and business finance the topics selected form the eight sections of the book 1 agency theory and risk sharing 2 information and incentives 3 capital markets and moral hazard 4 financial contracting and dividends 5 external accounting and auditing 6 coordination in groups 7 property rights and fairness 8 agency costs

the book covers many topics including unconditionally secure rfid systems dynamic rfid tag authentication rfid ownership transfer

fingerprinting rfid tags and secure rfid supported supply chains

economics of accounting information in markets examines the fundamentals of a variety of economic analyses of the decision facilitating and decision influencing roles of information that are pertinent to the study of the economic impact of accounting while much of information economic analysis makes no explicit reference to accounting many generic results apply to accounting reports furthermore the impact of accounting reports depends on the other information received by the economy s participants hence it is essential that accounting researchers have a broad understanding of the impact of publicly reported information within settings in which there are multiple sources of public and private information the focus in this volume is on the decision facilitating role of information with emphasis on the impact of public and private information on the equilibria and investor welfare in capital and product markets
