a remarkable personal and professional chronicle by one of today's leading physicists this is a collection of chen ning yang's personally selected papers supplemented by his insightful commentaries including previously unpublished or hard to find works this volume contains yang's important papers on statistical physics nuclear forces and particle physics among them are his seminal work with t d lee on the

nonconservation of parity for which they won the nobel prize and his work with r 1 mills which led to modern gauge theories with their exciting prospects for the broad unification of field theories the commentaries were written especially for this volume and provide a fascinating account of yang s development as a physicist as well as a look at many important physicists of the 20th century they trace the development of yang s interests and ideas from his graduate school days to the present showing how he worked with his colleagues and how their physics came into being together the papers and commentaries in this unique collection comprise a powerful personal statement shedding light on both the intellectual development of a great physicist and on the nature of scientific inquiry

writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it however many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented it is one thing to write a good scientific paper however it is quite another thing to get it published this requires some additional nous in writing this book don harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor by his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn t the material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error the text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers the author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful all major points are illustrated with examples from his own published works the book is written in the form of a manual for constructing a journal manuscript read a chapter write a section however the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments each chapter concludes with a checklist to ensure all the key elements have been addressed
