inspired by many successful years of teaching to analysts in training franco de masi has selected the most significant lessons and added a few new ones to provide an enriching discussion of psychopathology and psychoanalytic clinical work lessons in psychoanalysis begins with a general discussion of the scientific status of psychoanalysis its main theories and models and the way in which the unconscious registers emotional reality these are followed by detailed chapters on key topics which relate more closely to clinical work de masi begins with the problem of diagnosis in

psychoanalysis and the importance of a patient's clinical history he then turns his attention to transference and the analytic relationship which he views as central to clinical work followed by chapters on the analytic impasse and the use of countertransference he then deals with other vital themes regression anxiety phobia and panic trauma depersonalisation in the various syndromes melancholic and non melancholic depression narcissism and psychic withdrawal he concludes with some final considerations of analytic therapy de masi makes clear that analytic concepts are not linear but formed over time from numerous contributions to demonstrate this he provides a description of how ideas evolved to form a concept following the trajectory enables a fuller understanding and demonstrates the flexibility of analytic concepts to incorporate new contributions without losing meaning de masi also includes data from neuroscientific research on certain phenomena to broaden the discussion and demonstrate what is happening in other related fields his work shows that psychoanalysis has the capacity to be a unitary body which allows various models and theories to coexist even where disagreement may arise this book is essential reading for trainee psychoanalysts and students and highly recommended for qualified professionals who continue to question analytic practice and theory

in this delightfully readable and clearly written volume the world renowned psychoanalyst moustafa safouan considers the works of freud and lacan when safouan met lacan in 1949 he was all but ready to abandon the field due to the many contradictions and obscurities he found in freud yet thanks to lacan's early presentation of the father as real imaginary and symbolic safouan stayed on working with lacan until lacan's death in 1981 one can track the evolution of safouan's teaching through his participation in lacan's published seminars and his early contributions safouan wrote this book in english starting with a transcript from a series of lectures he delivered to the lacanian school of psychoanalysis in san francisco in march of 2001 safouan clears up many of lacan's own obscurities although he is quick to point out that there are no contradictions in lacan readers will find the cause of desire both through the signifier and through the normative rather than normal development of the child safouan explains the three forms of lack the root of subjectivity the desire of the analyst the other as different from the other the object cause of desire transference countertransference and lateral transference and the analytic act in a narrative that brings these and other concepts together in a dictionary that could never be divided by terms
