in history to be both respected by critics as a creative cutting edge force and embraced by the general public as a popular figure building art shows the full range of gehry s work from early houses constructed of plywood and chain link fencing to lamps made in the shape of fish to the triumphant success of such late projects as the spectacular art museum of glass in paris it tells the story behind gehry s own house which upset his neighbors and excited the world with its mix of the traditional and the extraordinary and recounts how gehry came to design the guggenheim museum in bilbao spain his remarkable structure of swirling titanium that changed a declining city into a destination spot building art also explains gehry s sixteen year quest to complete walt disney concert hall the beautiful acoustically brilliant home of the los angeles philharmonic although gehry s architecture has been written about widely the story of his life has never been told in full detail here we come to know his jewish immigrant family his working class toronto childhood his hours spent playing with blocks on his grandmother s kitchen floor his move to los angeles when he was still a teenager and how he came unexpectedly to end up in architecture school most important building art presents and evaluates gehry s lifetime of work in conjunction with his entire life story including his time in the army and at harvard his long relationship with his psychiatrist and the impact it had on his work and his two marriages and four children it analyzes his carefully crafted persona in which a casual amiable aw shucks surface masks a driving and intense ambition and it explores his relationship to los angeles and how its position as home to outsider artists gave him the freedom in his formative years to make the innovations that characterize his genius finally it discusses his interest in using technology not just to change the way a building looks but to change the way the whole profession of architecture is practiced at once a sweeping view of a great architect and an intimate look at creative genius building art is in many ways the saga of the architectural milieu of the twenty first century but most of all it is the compelling story of the man who first comes to mind when we think of the lasting possibilities of buildings as art

focusing on six leading contemporary architects peter eisenman frank gehry bernard tschumi zaha hadid rem koolhaas and steven holl this book puts forward a unique and insightful analysis of neo avant garde architecture it discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the 19th century german architect gottfried semper in doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present the work of each discussed architect is seen as addressing a historiographical problem to this end and this is the second important aspect of this book the chosen buildings are discussed in terms of the thematic of the culture of

building the tectonic of column and wall for example rather the formal and this through a discussion that is informed by the latest available theories having set the aesthetic implication of the processes of the digitalization of architecture the book s conclusion highlights strategies by which architecture might postpone the full consequences of digitalization and thus the becoming of architecture as ornament on its own right
