max scheler 1874 1928 decisively influenced german philosophy in the period after the first world war a time of upheaval and new beginnings without him the problems of german philosophy today and its attempts to solve them would be quite inconceivable what was new in his philosophy was that he used phenomenology to investigate spiritual realities the subject of on the eternal in man is the divine and its reality the originality and non derivation of religious experience scheler shows the characteristic quality of that which is religious it is a particular essence that cannot be reduced to anything else it is a sphere that belongs essentially to humankind without it we would not be human if genuine fulfillment is denied it substitutes come into being this religious sphere is the most essential decisive one it

determines man's basic attitude towards reality and in a sense the color, extent and position of all the other human domains in life it forms the basis for various views about life and thought. Scheler was emphatically an intuitive philosopher. In Scheler's work the break between being as the almighty but blind rage and value as the knowing but powerless spirit has become complete and makes of each human a split being. Personal experiences may be reflected here. The development of Scheler's work as a whole was highly dependent on his personal experiences. It is this that gives Scheler's work its liveliness and its validity.

This book critically examines the debate on Martin Heidegger's concept of *Entscheidung* (decision) and his engagement and confrontation with Nazism in terms of his broader philosophical thought. It argues that one cannot explain Heidegger's actions without accounting for his idea of decision and its connection to his understanding of individual fate and national and European destiny. The book looks at the relation of biography to philosophy and the ethical and political implications of appropriating Heidegger's thinking in these domains of inquiry. It highlights themes such as Heidegger's differences with the neo-Kantians in Germany, Heidegger on Kant and practical reason and his reading of Nietzsche and Hegel. It offers a philosophical assessment grounded in Heidegger's own texts with reference to historical and other philosophical commentaries on the rise of national socialism in post-Weimar Germany and the philosophical issues associated with the interpretation of Nazi genocide and ideology. An important intervention in Western philosophy, this book will be of great interest to scholars and researchers of political philosophy, continental philosophy, German philosophy, philosophy in general and political studies.

This book provides an in-depth introduction to existential psychotherapy and offers a fresh perspective for anyone training in psychotherapy, counselling and psychoanalysis.

god is infinite but language finite thus speech would seem to condemn him to finitude in speaking of god would the theologian violate divine transcendence by reducing god to immanence or choose rather to remain silent at stake in this argument is a core problem of the conditions of divine revelation how in terms of language and the limitations of human understanding can transcendence ever be made known does its very appearance not undermine its transcendence its condition of unknowability speech and theology posits that the paradigm for the encounter between the material and the divine or the immanent and transcendent is found in the incarnation god's voluntary self immersion in the human world as an expression of his love for his creation by this key act of grace hinged upon christ's condescension to human finitude philosophy acquires the means not simply to speak of perfection which is to speak theologically but to bridge the gap between word and thing in general sense

these books were written as consultation books to be used to solve problems they are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems the unicist ontology of evolution explains and predicts the evolution of living beings their produces and their actions in a unified field ruled by concepts and their natural laws these natural laws have been named as ontogenetic intelligence this evolutionary approach enables the analysis of and influence upon complex realities

eugen fink is considered one of the clearest interpreters of phenomenology and was the preferred conversational partner of edmund husserl and martin heidegger in play as symbol of the world fink offers an original phenomenology of play as he attempts to understand the world through the experience of play he affirms the philosophical significance of play why it is more than idle amusement and reflects on the movement from child's play to cosmic play well known for its nontechnical literary style this skillful translation by ian alexander moore and christopher turner invites engagement with fink's philosophy of play and related writings on sports festivals and ancient cult practices

maurine stuart 1922 1990 was one of a select group of students on the leading edge of buddhism in america a woman who became a zen master in this book she draws on down to earth zen stories her friendships with japanese zen teachers and her experiences as a concert pianist to apply the inner meanings of buddhism to practicing the basic ethics of

daily living nowness unselfishness compassion and good will toward every living being she emphasizes that inner growth comes through our own efforts and intuition especially as we cultivate them through meditation practice we can then take what we have learned in meditation and use it to respond to our daily lives in a straightforward and creative way guided not by concepts or dogma but by direct insight into the reality of the present moment

what is zen buddhism what is its value for christians how does it relate to christian beliefs how does zen relate to the world and to changing it total liberation explores these and other questions about zen and christianity habito has two basic aims first he demonstrates the relevance of zen to a contemporary christian spirituality comparing zen insights to the often overly cerebral qualities of western christianity second he shows how a blending of zen and christian spirituality complement and sustain a social active role in the world while an important dimension of zen involves contemplation and personal growth habito points out that this basic ideal ultimately expands to embrace all of creation and not just the individual self similarly the christian spiritual relationship with god finds its expression not only in the personal and contemplative but in action total liberation defines true spirituality as engagement with rather than disassociation from the social dimension it shows that zen no less than christian spirituality must lead to active involvement and struggle against social violence and oppression

in the mid eighteenth century metaphysics was broadly understood as the study of three areas of philosophical thought theology psychology and cosmology this book examines the fortunes of the third of these formidable metaphysical concepts the world sean gaston provides a clear and concise account of the concept of world from the mid eighteenth century to the end of the twentieth century exploring its possibilities and limitations and engaging with current issues in politics and ecology he focuses on the work of five principal thinkers kant hegel husserl heidegger and derrida all of whom attempt to establish new grounds for seeing the world as a whole gaston presents a critique of the self evident use of the concept of world in philosophy and asks whether one can move beyond the need for a world like vantage point to maintain a concept of world from kant to the present day this concept has been a problem for philosophy and it remains to be seen if we need a new copernican revolution when it comes to the concept of world
