until recently medieval maps were often looked upon as quaint amusing and quite simply wrong by comparison the best examples of modern cartography appear to offer a much more accurate record of the world however as professor edson makes clear in this stimulating book when seeking the meaning and purpose of maps in the middle ages one cannot assume that they were used for the same purposes or had the same meaning as they do today in fact the differences in structure and content give us an intriguing insight into how medieval mapmakers and readers saw their world by a close study of the context in which the mapmakers produced their work it can be shown that they were often striving to present and make sense of a world picture that naturally incorporated key events from the past at the same time showing a narrative of human spiritual development from the creation to the last judgment from publisher's description

this book provides a full and practical account of management of myotonic dystrophy the commonest muscular dystrophy of adult life and a condition of exceptional variability written for neurologists clinical geneticists and other clinical specialities involved with the disorder it deals with both the neurological aspects and also the wide range of systemic complications that may occur in addition it provides details of information and support available to patients and families and gives a summary of the present state of clinical trials of therapeutic agents these sections are preceded by general introductory chapters describing both the clinical features and also the current state of research into understanding the underlying mechanisms
