this book deals with several aspects of waste material recycling it is divided into three sections the first section explains the roles of stakeholders both informal and formal sectors in post consumer waste activities it also discusses waste collection programs for recycling the second section discusses the analysis tools for recycling system the third section focuses on the recycling process and optimal production i hope that this book will convey both the need and means for recycling and resource conservation activities to a wide readership at both academician and professional level and contribute to the creation of a sound material cycle society

metal recycling is a complex business that is becoming increasingly difficult recycling started long ago when people realized that it was more resource and cost efficient than just throwing away the resources and starting all over again in this report we discuss how to increase metal recycling rates and thus resource efficiency from both quantity and quality viewpoints the discussion is

based on data about recycling input and the technological infrastructure and worldwide economic realities of recycling decision makers set increasingly ambitious targets for recycling but far too much valuable metal today is lost because of the imperfect collection of end of life eol products improper practices or structural deficiencies within the recycling chain which hinder achieving our goals of high resource efficiency and resource security and of better recycling rates
